# AGU — SINCE 1966

**"AGU WAS THE  
FIRST COMPANY  
TO SPECIALISE  
IN THE MANU-  
FACTURE OF  
LIGHTWEIGHT  
BIKE BAGS  
MADE OF TOUGH  
NYLON."**

#### **ALKHAARSE GROOTHANDELS UNIE**

The Alkmaarse Groothandels Unie was founded in 1966, by a merger between three bicycle wholesalers; the company's tremendous success and international breakthrough followed ten years later. AGU was the first company to specialise in the manufacture of lightweight bike bags made of tough nylon. Initially, the bike bags were manufactured by Yashuo Kurata, who produced the bags at his workshop in the heart of Tokyo.

#### **KLICKFIX**

By developing innovative attachment systems, AGU and KLICKfix enable cyclists all over the world to ride their bikes safely and comfortably whilst carrying luggage. Day in, day out.

# #EVERYDAYRIDING

**At AGU, we promote pedalling. Whether you are looking for a better way to start your day, a new challenge, or the fulfilment of a lifelong dream, we will move forward together when you ride your bike.**

#### **We move forward.**

We know that because we move forward when we ride our bikes. When sprinting for town signs, going for a grocery run, or taking our families bikepacking, cycling makes us happier and healthier. Our heads clear. So do our priorities. And the truth is that when more people ride bikes, this world of ours becomes cleaner for all of us.

#### **Let's ride.**

That is why we dedicate our days to making the best, most innovative, comfortable, and sustainable cycling equipment: so you can enjoy rainy rides to work, cycle between appointments without breaking a sweat, or top that col that captured your imagination when you were a child. Through a wide range of apparel and accessories, we offer all cyclists the means and the ways to enjoy life on the bicycle all year long. No matter the conditions, the distance, the roads or the bike you ride. Divided into 4 distinctive collections, every cyclist will surely find what they need at AGU. In all collections, innovation is key, we never stop developing new fabrics, searching for more sustainable alternatives, altering designs, implementing feedback and applying the latest technologies in apparel and accessories. Season after season. Create the difference.

Let's ride!

**#everydayriding**

# GREENSPHERE

**AT AGU, WE WANT TO MAKE #EVERYDAYRIDING POSSIBLE NOW AND IN THE FUTURE. SO WE MAKE EVERY EFFORT TO PRESERVE THE ENVIRONMENT WHEN PRODUCING OUR BIKE BAGS. WITH THIS IN MIND, THE CONCEPT OF GREENSPHERE WAS BORN.**

Greensphere products feature the Greensphere label, a mark of sustainability. Greensphere products live up to strict guidelines guaranteeing their excellence. By using more eco-friendly and recycled materials, we increase our contribution to a healthier planet. For you, it means choosing better materials to wear. The Greensphere concept focuses on meeting the needs of the present without compromising the ability of future generations to meet theirs.

At AGU we believe in the power of bikes. Cycling is the most sustainable mode of transportation there is. It is the remedy for traffic jams and makes for cleaner air. The world will be better for it, and you will be better for it. AGU makes smart and valuable products of the highest quality, which are made to last – sometimes 25 years or longer. We strive to develop our products in a sustainable manner with the right materials in the right factories and under the right conditions. In our production process and in our way of doing business, we strive to do as little harm to the world as possible.

**GREENSPHERE**

# TECHNOLOGY

For almost half a century, AGU has offered perfect solutions for anyone wishing to carry luggage on their bikes. We keep innovating, because we know what is important to cyclists. Whether you go grocery shopping or bikepacking, we make the right bags for you. Our bags use the very latest technologies, like welded seams and completely waterproof PVC-free bags. Enabling you to transport luggage safe and easy. Every day, rain or shine.

## ICONS USED IN THIS CATALOGUE

**GREEN SPHERE**

**DRYLINER TECHNOLOGY**

**YKK ZIPPERS**

**3M REFLECTION**

**WATERPROOF**

**DWR DURABLE WATER REPELLENT**

## ZIPPERS

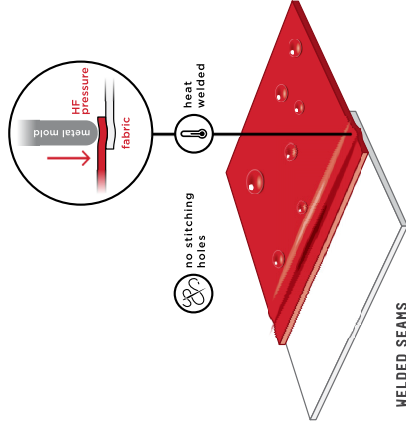

AGU uses YKK zippers for its range of bags. Tough zippers with the highest possible quality and sustainability. YKK zippers are available in many designs: from conventional to water repellent, where a layer is applied to the zipper tape which keeps moisture out.

## VISIBILITY

For optimum visibility in all types of weather, AGU's bike bags incorporate reflective elements and materials: 3M Scotchlite reflection, proven to be the best and most visible on the market, is used on almost all of our bags. This same product is even used for road markings, where visibility and sustainability are of very high importance.

# WELDED SEAMS

Instead of being stitched, welded seams are fused together by means of high-frequency welding of the fabric, which ensures a 100% waterproof and dust-proof seal between the different panels.

WELDED SEAMS

**WATERPROOF GENERALLY MEANS THAT THE CONSTRUCTION AND MATERIAL PREVENT WATER PENETRATION. IN COMBINATION WITH THE SEAMS USED, THESE FACTORS DETERMINE HOW MUCH WATER PRESSURE, AND THEREFORE RAIN, THE BAGS CAN WITHSTAND.**

# DRYLINER TECHNOLOGY

AGU DryLiner Technology combines a water repellent outer layer with a taped waterproof lining.

As the water repellent outer layer is stitched, there are no compromises in the design and useful features such as straps and pouches can be integrated. The result is a win-win situation for the user: a modern and functional bag with a waterproof construction. The advantages of DryLiner Technology:

**Optimal protection**

By using a waterproof liner, even laptops and other expensive items can now be transported comfortably and safely in these bags, where they also remain dry.

**No concessions when it comes to design**

The DryLiner construction makes every design possible. This means we can integrate useful features, such as straps and storage compartments on the outside of the bike bag, without compromising on water tightness and ease of use.

**Practical and dry**

Velcro is used on the DryLiner lining, meaning it is easily detachable, allowing the outer layer to dry quickly, thus preventing moisture build-up on the inside of the bag.

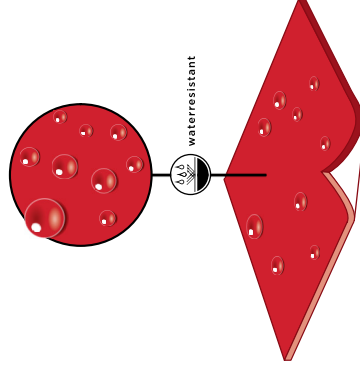

DRYLINER TECHNOLOGY

# WATER-REPELLENT

The fabric is treated with Durable Water Repellent (DWR) coating.

**DWR**

This DWR coating encourages (rain) water to bead up and roll off the surface. However, in the event of lengthy exposure to water, moisture can penetrate through the seams and the fabric. In those circumstances, it would be wise to protect your possessions with, for example, a waterproof rain cover around the bag.

DMR - DURABLE WATER REPELLENT - TREATMENT

# MOUNTING SYSTEMS

**MIK**  
MOUNTING IS KEY

**KLICKfix**

**MIK**  
Using a stable rear-carrier platform system to mount a wide variety of accessories from different brands, MIK guarantees fast and simple attachment and removal of your bags or basket to your bike. The system is highly stable, quiet in use and also includes an integrated anti-theft lock. Mounting Is Key.

**KLICKFIX**  
Since 1989, KLICKfix has been developing and producing mounting systems ensuring rapid operation of a variety of fastening systems, for both bags and baskets. All products are developed and tested in Germany and the company's innovation focus is dedicated to increasing durability and sustainability.

**MODULE RAIL**  
This aluminum rail contains two hooks that slide sideways, meaning it fits easily to any luggage rack. The hooks have an automatic adjustment device, meaning they can be attached and removed very easily. These hooks are suitable for a rack thickness of 8-16 mm. The Module Rail system allows bike bags to hang lower down, meaning there is extra space on the top of the luggage rack to carry more luggage. The use of aluminium makes the bags light and rigid, ensuring they remain hanging in the right place.

**KLICKFIX KOMPAKT RAIL**  
Automatic adjustment of the locking mechanism on carriers with Ø 8-16mm. The hook position can be easily adjusted horizontally by pressing the black button. The narrow and short shape of the hooks allows the rail to be used even on racks with integrated batteries or spring clamps.

**TOP VARIO HOOK**  
The Top Vario Hook system comprises two fixed hooks that can be clicked together and released by means of a spring. A simple attachment system for luggage racks, which is very easy to use. These hooks are suitable for a rack thickness of 8-16 mm. Top Vario Hook allows bike bags to hang lower down, meaning there is extra space on the top of the luggage rack to carry more luggage.

**E-VARIO HOOK**  
The Vario system is a user friendly and solid attachment system for luggage racks, suitable for a rack thickness of 6 to 16 mm.

**KLICKFIX HANDLEBAR BAG ATTACHMENT SYSTEM**  
The KLICKfix attachment system for handlebar bags is extremely solid and user friendly. Easy to attach using the handlebar bag adapter. The adapter is available in different designs.

**WATERPROOF**

All Shelter bags are 100% waterproof. Through the use of waterproof fabrics, welded seams and efficient roll-top closures. To finish it off, all bags are coated with a PU coating and therefore completely PVC-free.

**CLEAN SINGLE BIKE BAG SHELTER MEDIUM**

The Shelter Clean rear pannier sets a new standard for waterproof bike bags. With its reliable roll-top closure system and welded seams your luggage remains securely stashed away in any bad weather condition. An inner compartment keeps your stuff ordered and the detachable shoulder strap allows for easy carrying off the bike when you arrive at your destination. The bags are available in several subdued colourways to suit any style. The color variant 'Reflection Mist' has a reflective overall print that ensures you are highly visible during the dark days. The color variant 'Neon Yellow' makes you stand out visually during the daytime in any rainy, misty or gloomy condition.

- 100% Waterproof recycled polyester
- Lightweight
- 3M Reflection
- Mounting through KLICKfix Module Rail and rotating hook

# SHELTER COLLECTION

We took the greatest care in ensuring the AGU Shelter bike bags collection is 100% waterproof. To increase riders' visibility during gloomy days and dreary evenings we made sure to equip our bags with Hi-vis colors and Reflective prints and details. All products feature recycled materials as part of our Greensphere program, which aspires to maintain a healthy and sustainable production process. The lasting value of KLICKfix mounting systems have already proven itself, and make for quick and easy mounting to the bike. With these durable qualities and added functionalities as removable shoulder straps, carrying handles and inner compartments, these bags form the perfect partner for every resolute commuter out there. The new AGU Shelter collection is also available in several themed store modules to allow for convenient one-stop-shopping. Besides that the Shelter bags are made of 100% recycled polyester, they are PVC-free. This means that the product is coated with a PU (polyurethane) coating instead of PVC. This material is a lot less harmful to both humans and the environment.

**TECH SINGLE BIKE BAG SHELTER LARGE**

Our brand new Shelter Tech bag is truly a reliable companion for any bold commuter. With its acutely designed 100% waterproof fabrics, shoulder strap, padded laptop compartment and signature belt loops it has everything you need – and more – to transport your baggage safely. Available in several sophisticated colourways to suit any style, this sturdy bag will accompany you during many years on the bike, day in, day out.

# PERFORMANCE COLLECTION

The lightweight Performance Series is designed with optimum ease of use in mind plus optimum protection against the elements during recreational use, such as long cycle rides or bikepacking trips. The collection includes a whole range of models, from front and rear bike bags, to handlebar bags and saddlebags. With properties like DryLiner technology, you don't have to worry about the weather conditions and the user-friendly KLICKfix system also ensures fast attachment to the bicycle. The Performance Series is made from recycled polyester, and uses YKK zips for the best performance, always and everywhere. #everydayriding

## HIGHLY WATER RESISTANT

The bags in the H2O collection use DryLiner Technology, meaning the bags are highly water resistant, yet their functionality remains unchanged. Ideal for cyclists who require additional storage space on the outside of the bag. These bags allow you to enjoy a carefree trip, without worrying about changing weather conditions.

### H2O HANDLEBAR BAG PERFORMANCE KLICKFIX

The H2O Handlebar Bag Performance is a sturdy bag and the DryLiner Technology provides a watertight inner lining. In combination with the roll-top opening, your luggage has extra protection against water. The bag also ensures even better visibility through the 3M reflection. The bag is made of premium quality recycled polyester and is therefore included in our Green Sphere range for the conscious customers who find it important to be able to make a sustainable choice.

- Highly water resistant through DryLiner Technology
- Lightweight
- 3M reflection
- Attachable using a KLICKfix handlebar adapter (not supplied with product)
- Green Sphere material: recycled water-repellent Polyester
- Zippable front compartments, with YKK (water-repellent) zippers
- Removable shoulder strap
- Extra attachment loops for lighting or general luggage

**WATER REPELLENT**

On the road every day with your luggage, comfortable and safe. The bags in the Essentials collection have a sustainable DWR coating. Functional, contemporary and made from superstrong recycled 600D polyester, meaning the bag can withstand knocks and a small rain shower without spoiling your day. If you want to be absolutely certain that your gear will remain dry, you can protect your bag with a waterproof rain cover.

**DWR HANDLEBAR BAG PERFORMANCE KLICKFIX**

This handlebar bag is an essential item for all of your cycling trips. The KLICKfix attachment system allows you to attach this bag easily and quickly to the handlebars. An additional advantage is that, through the use of 3M reflection, the bag provides extra visibility. The handlebar bag is made from recycled water-repellent polyester. With the supplied extra strap you can convert the bag into a useful shoulder bag in no time at all.

- Water-repellent (Durable Water Repellent)

# URBAN SERIES

Fashion and functionality are combined in the Urban Series, a range of bike bags especially designed for everyday use in the city. Sturdy products with a stylish look and available in multiple colour combinations. Equipped with the high-strength KLICKfix system, allowing you to remove the bags easily and quickly from your bike and take them with you. Accessories such as a removable laptop sleeve contribute to everyday usability in an urban environment. #everydayriding

**HIGHLY WATER RESISTANT**

The H2O collection with DryLiner Technology has been developed for the discerning bicycle commuter, who wants to use his bike in all weather conditions, with the certainty that his luggage will remain dry. The Hypalon base-plate provides extra protection and the recycled 600D polyester can withstand knocks. Equipped with 3M reflective elements and carrying straps, enabling the luggage to be removed from the bicycle and carried.

**H2O ROLL-TOP SINGLE BIKE BAG URBAN**

Not only does the functional roll-top opening give the Urban Trend H2O bike bag a cool look, but also ensures that your possessions are very well protected against rain. Made from water-repellent 600D polyester. The use of modern urban prints and fabrics make this highly water resistant trend range very distinctive. In combination with the Dryliner Technology, a laptop sleeve can be added to the bike bag and the shoulder strap, which is also supplied, enables you to carry the bike bag as a shoulder bag.

- Highly water resistant through Dryliner Technology
- 3M Reflection
- YKK zippers
- CLICKfix Vario hooks (ø 6-16mm)
- Removable shoulder strap
- Detachable laptop sleeve, suitable for a 14-inch laptop, including additional storage compartments (not supplied)

# VENTURE COLLECTION

Whether you're out riding for a weekend, a week or longer, the AGU Venture bikepacking collection comprises everything you'll ever need to expand your riding horizon. With over 50 years of experience in cycling bags under our belt, this range was specifically designed by bike packers for bike packers, at an attractive price. Two new handlebar bags are added, developed in close cooperation with Team Jumbo-Visma riders Robert Gesink and Wout van Aert. The quick and easy modular attachment system ensures these durable bags to fit any frame. Let AGU lighten your load and open up those unbeaten paths for adventurous #everydayriding.

## WATER REPELLENT

These bags are the perfect choice for bikepackers. Functional, contemporary and with reflective elements for additional visibility. With a water repellent coating so a small rain shower won't spoil your day and you can enjoy every ride on your bike.

## BAR BAG HANDLEBAR BAG VENTURE

When Team Jumbo-Visma rider Robert Gesink came to us with the idea of a new bar bag, inspired by the classic AGU handlebar bags, we started designing right away. Gesink is very enthusiastic and uses the bag to bring food and spare gloves, which saves room in the back pockets of his jersey. The main compartment of the bag is easily accessible from the top and holds a removable divider to organize everything you want to bring. Two mesh pockets are added to keep small items in place. On the front of the bag you can find a second pocket. The loops can be used to attach a light or other items to the bag. A large 3M reflective logo is added for enhanced visibility in traffic. For an even better visibility, the color way 'reflective mist' has a reflective overall print that ensures high visibility during the dark days. The bar bag comes with an adjustable shoulder strap, so you can easily carry it off the bike. This bag is made of 100% recycled Greensphere polyester.

- Green Sphere material, recycled water-repellent Polyester
- High visibility by 3M reflection
- YKK (water-repellent) zipper closure
- Inner side mesh pockets
- Inner divider
- Removable shoulder strap
- Usable as handlebar bag and as frame bag

## WATER REPELLENT

These bags are the perfect choice for bikepackers. Functional, contemporary and with reflective elements for additional visibility. With a water repellent coating so a small rain shower won't spoil your day and you can enjoy every ride on your bike.

## ROLL BAG HANDLEBAR BAG VENTURE

Team Jumbo-Visma rider Wout van Aert asked us to make the perfect bike bag for his training rides, inspired by the classic AGU handlebar bags. This roll bag is a very practical bag to bring on every adventure. Whether you go bikepacking or just for a short ride, the big main compartment can hold all kind of necessities, such as cookies, gels but a camera or phone as well. The main compartment can be closed with a water-repellent zipper. On the front several loops are added so you can easily attach a small light or other item. Two mesh pockets on each side of the bag keep small things like cookie wrappers nicely tucked away. Behind both mesh pockets a large 3M reflective logo is placed for enhanced visibility in traffic. For an even better visibility, the color way 'reflective mist' has a reflective overall print that ensures high visibility during the dark days. This bag is made of 100% recycled Greensphere polyester.

- Green Sphere material: recycled water-repellent Polyester
- High visibility by 3M reflection
- YKK (water-repellent) zipper closure
- Side mesh pockets

### WATER REPELLENT

These bags are the perfect choice for bikepackers. Functional, contemporary and with reflective elements for additional visibility. With a water repellent coating so a small rain shower won't spoil your day and you can enjoy every ride on your bike.

### HANDLEBAR BAG VENTURE

Our Venture Handlebar Pack is made from Greensphere water-repellent recycled polyester, with a roll-top construction that shields your gear from dirt and moisture. Attached solidly to the bars with a system of multiple straps, the pack offers valuable storage space without influencing the handling of your bike negatively. With the included spacers you create ample room for your cables and navigation, and the high quality 3M reflective elements guarantee visibility in low-light conditions. The color variant 'Reflection Mist' has a reflective overall print that ensures you are highly visible during the dark days.

- Roll-top opening
- High visibility by 3M Reflection
- Green Sphere material: recycled water-repellent Polyester
- Spacers and straps with quick release buckles
- Compression straps

41503200-004 Blue	17 L	€ 60	€ 60 DKK	449 SEK	659

### TOP-TUBE FRAME BAG VENTURE

The Venture Top Tube Bag is the perfect storage for items you want to keep within reach while being on the road. The zipper is easy to open with one hand, to offer quick access to your valuables such as your camera and phone, when you need them. Or use it to store a bag of food to keep munching on the go. The color variant 'Reflection Mist' has a reflective overall print that ensures you are highly visible during the dark days.

- Green Sphere material: recycled water-repellent Polyester
- High visibility by 3M reflection
- One handed zipper opening
- YKK (water-repellent) zipper closure
- Inner side mesh pockets
- Inner divider

41503400-000 Reflective Mist	0,7 L	€ 30	€ 30 DKK	219 SEK	319

### SNACK-PACK VENTURE

This is the perfect companion for the hardy bike-travellers who are inclined to drink and eat while pedalling, or just want to store some extra food. Always within reach and easy to open one-handed, the Venture Snack Pack offers yet more storage space for bars, nuts, crisps or drinks, right there on your handlebars. The color variant 'Reflection Mist' has a reflective overall print that ensures you are highly visible during the dark days.

- Green Sphere material: recycled water-repellent Polyester
- High visibility by 3M reflection
- Two external mesh pockets
- Mounts to either side of stem
- One handed opening and closure

**WATER REPELLENT**

These bags are the perfect choice for bikepackers. Functional, contemporary and with reflective elements for additional visibility. With a water repellent coating so a small rain shower won't spoil your day and you can enjoy every ride on your bike.

**TUBE FRAME BAG VENTURE**

During long trips, or for carrying a tent or tarp, the convenient and spacious Venture Frame Pack will prove itself an essential part of your gear. Making clever use of a modular system of straps, it is quickly attached to the top tube, and will easily fit most frames out there. A clever hydration port opens up the possibility to use water packs, and the robust GreenSphere polyester is proven to be water-repellent and durable when it counts most. The color variant 'Reflection Mist' has a reflective overall print that ensures you are highly visible during the dark days.

- Green Sphere material: recycled water-repellent Polyester
- High visibility by 3M reflection
- YKK (water-repellent) zipper closure
- Hydration port

**SEAT-PACK VENTURE**

The Venture Seat Pack is an essential part of any bikepacking trip. Easily attached underneath your saddle, you won't even notice it's there until you need your dry clothes or sleeping kit. The waterproof Dryliner Tech inner and roll-top construction keep your gear clean and dry even in the most vile of conditions, so you can focus on finding the best possible routes. With its robust appearance and reinforced parts in critical places, this bag will continue to be serve for many trips to come. The color variant 'Reflection Mist' has a reflective overall print that ensures you are highly visible during the dark days.

- Roll-top opening
- Waterproof through Dryliner Technology
- High visibility by 3M Reflection
- Made of recycled water-repellent Polyester
- Compression straps
