# 21

# COMMITTED TO GREEN

Our product program gets a special boost inspired by the Triple R's of Reduce, Reuse and Recycle. Reduction of waste with packaging optimization, reuse of materials for lining, liners, shells, gradual introduction of recycled materials in all the product lines.

**GO DIGITAL  
REDUCE PAPER & SAVE TREES**

[ROCES.COM/IT/MANUALS](http://ROCES.COM/IT/MANUALS)

In order to reduce paper consumption, Roces has progressively introduced, whenever possible the digital version of the product manual, which can be downloaded as a PDF file. Customer can look for updated manuals for their product category at [roces.com/it/manuals](http://roces.com/it/manuals) or simply scanning the following QR code. A graphic instruction has been added to product packaging. CE products still come with paper manual due to the fact that dematerialization is still not allowed.

**LOW IMPACT & ECO FRIENDLY  
PRODUCT PACKAGING**

Aggressive product packaging is plastic-free. Boxes are made of havana cardboard (no plastic film coating) which leads to low ink consumption. Polybags protecting skates are made of recycled PE. Ecological product manuals. Every effort has been taken to create a more sustainable and frustration-free product packaging.

**OPTIMIZED  
AND REDUCED  
INDUSTRIAL WASTE**

**ENERGY SAVING  
PRODUCTION  
PROCESSES**

Throughout the Roces production process, resources are optimized, waste and scrap quantities are reduced and, thanks to this system, substantial energy savings are achieved during the entire process.

# ALL COLORS MELT IN BLACK

**BLACK  
IS ROCES'  
NEW GREEN.**

**ROCES**  
SPIRITANDSOULOFKATING

As people can see from the green core index indicators of our latest catalogues, black polypropylene/polyurethane shells show a higher recycled material index compared to the white ones (this is why for example M12 UFS in black can be considered 97% from recycled materials since day one). Taking this in to consideration and looking at recent market trends, you will discover that we are offering black-based colorways more and more. In other words, black is the new green.
