SUSTAINABILITY AND ECO PROGRAMS

MINIMAL AND SUSTAINABLE PACKAGING

All boxes are made of 100% recycled cardboard and are 100% recyclable.

The protective plastic bags have been swapped for paper sheets. Where possible, the hardware bag is now a paper envelope.

GOING DIGITAL

To save trees, all our user manuals are now digital and available for use and download by scanning the QR code on the box.

WHAT WE DID, WHAT WE DO, WHAT WE WILL DO

PAST	PRESENT	NEAR FUTURE
Continuous use of recycled polyurethane for the black skate production (since 1978).	Introduction of the RECYCLE line in the ice skate collection (that means use of recycled PET, PU and recycled foams for padding).	The goal is the expansion of RECYCLE design inspiration to all product categories and to as many products as possible.
Size adjustability as a market standard for inline and ice skates and recently for junior ski boots, a typical «more with less» design case: less plastic, less waste, dramatically lower impact on transport and logistics.	Introduction of havana cardboard packaging (and no plastic film coating) and low ink consumption. Today's percentage of recycled cardboard is around 80%.	The goal is to reach soon the 100% of recycled cardboard (no plastic film coating) and even lower ink consumption.
<p>Milestones:</p> <p>[1978] First ice skate made in plastic and it's 100 recycled</p> <p>[1981] First ever size adjustable skate</p> <p>[2002] Dual skate, only one skate for inline and ice skating.</p> <p>[2006] First ever size adjustable ski boot</p>	Ice skate blade covers (meaning the ones coming with the product in the box) made of 100% recycled plastic.	The goal is the substitution of all polybags used for product packaging / transport with bags of sustainable material (over 1.000.000 bags less per year).
Sporting goods brand: sport is always for a less polluted world.	Sporting goods brand: sport is always for a less polluted world.	Sporting goods brand: sport is always for a less polluted world.
