REAL
RACING SERIES

Racing gliders for the new age of racing.

START®

REAL RACING SERIES

Racing Gliders for the new age of racing.

REAL RACING SERIES

Real innovation for real racing

Our all new RG Racing Glider series are next generation, fluor free, technoceramic gliders.

Advanced mixtures of numerous ceramic compounds influence the nano structure of the gliding surface to reduce both wet and

dry friction with new levels in durability. Additionally Graphite additives enhance performance in new snow while Molybdenum additives enhance performance in old, transformed and artificial snow.
