

AGU 
#EVERYDAYRIDING

**FALL/WINTER
2023/2024**

We love riding bikes, being on the road, being outside, enjoying every and any distance. And we love to share that passion with as many people as possible, every day. We encourage people to cycle more. To the supermarket on your city bike, commuting on your e-bike or putting yourself through the paces on your racing bike; come rain come shine, in all conditions, on all roads and on every bike: We are there for you. We are strong believers in the power of cycling.

How can we make the choice for the bike simple, easy, and attractive, for as many people as possible? That's the challenge we set ourselves every day. The weather is a decisive factor for many cyclists to get on their bikes or not. Rain, cold or a hot summer day can be challenging. But if you dress well, you can enjoy any and every ride. We want to offer you the best solutions to stay dry, warm, and safe on the road because we know what you as a cyclist need every day. Our solutions are the best performing and best looking rainwear, bike wear, bike bags and teamwear items you can find.

WE ARE AGU

DUTCH
CYCLING EXPERTS
SINCE 1966

We are a Dutch company and we've been making bike clothing since 1966 when three bike wholesalers in Alkmaar decided to work together and founded the Alkmaarse Groothandels Unie. It was a time in which a lot of people couldn't afford a car, and bikes were the best solution for transport available. From the very beginning we at AGU endeavored to help people use their bikes as often, and with as much freedom and ease of use as possible with bike wear, rain wear and bike bags.

Cycling is in the very DNA of the Dutch culture. We know all the challenges a cyclist can face, and we work on the best solutions to each and every one of them, every day. It is not only our passion, but it's also in our blood. The Dutch are sober, creative, realistic, but also ambitious. This combination means that we are always looking for the best quality for the best price. We make products that last with a modest but stylish design made to inspire.

For years, we have been proud partners in the world of cycling. With riders such as Cees Stam, Leontien van Moorsel, Tom Dumoulin and legendary teams like Panasonic and Rabobank. The Masterpiece of Team Jumbo-Visma during the 2022 Tour de France was an absolute highlight to us. We are very proud to be part of the team winning the yellow, green and polka dot jerseys. Our partnership with the Dutch National cycling federation KNWU is a new highlight. Those partnerships continuously inspire and motivate us to keep taking new steps. To make products better and better. Just like the riders, we too strive for the best possible result.

Our partnerships with Team Jumbo-Visma and the Dutch KNWU is not only about supporting and facilitating the success of the teams, but about the constant improvement of our products to meet the standards of performance and quality set by the most exacting cyclists in the world. The cyclists of the teams test new products extensively and offer their experience and feedback so that we can perfect our products. And it's not only the kit we design and develop for them to wear during training and races, the exact same solutions and technologies that drive their performance can be found in all the bike wear which is also available for all cyclists.

PRO SPORTS

INNOVATION

The world is changing at a rapid pace. The question is not whether we can keep up, but how we deal with it. Innovation is necessary to make our products better, smarter, and cleaner and has always been at the very core of what AGU does. Throughout the years we have introduced a host of innovative products, including the first light weight bike bags, the first carbon fibre chamois pad, designed an award winning iconic rainsuit, super aerodynamic helmets and much more.

This drive to innovate can be found throughout all our collections, from stand-out products such as our Heated Jackets and High Visibility garments, but it can also be found in smaller things, in every detail we think about. From extended cuffs, smart zips for optimal freedom of movement, to wind blocking technologies and body mapping. Everything to optimize the product for your needs on the bike.

We believe the bike can make a crucial contribution against climate change and make cities healthier and more livable. We want to make it easier, smarter, and more attractive to make that sustainable choice to get on your bike everyday with products that are produced in the most sustainable way available to us at any give time. Now, more than ever, we need people to get on their bikes. Every day. Everywhere.

Quality is a key factor in our vision of sustainability. Because quality works towards durability, i.e. the life span of a product. We would rather a cyclist buy one jacket which he can use for many years, than having to buy again and again because the quality of a product fails in too short a time. The longer a product lasts, the less you have to buy, the better it is for the environment. That is why at times we will make choices that don't seem the most sustainable in the short term but will be in the long term, because the product lasts (much) longer. For us at AGU, quality is sustainability.

For much more on our Sustainability Journey check out <https://agu.com/en/sustainability>

SUSTAINABILITY

LOOK BETTER

When you hear words like “functional”, “technical” or “highend performance” you might think we are talking about sensible but perhaps boring products. In that case, think again. Performance cyclists such as the men and women of Team Jumbo-Visma cyclists are nothing if not aware of how groomed they look on a bike. Style is equal to performance in road biking, and we design for it.

Even more so for city cyclists, for whom style and functionality need to come together. Because you want to feel good and look good. That combination really contributes to that daily choice for the bike. That is what our rain wear is all about and why we upped our game with the launch of a brand-new line of Urban Outdoor rain wear in 2021. A collection that immediately became a favorite of the customers and press alike, celebrating it as a long-awaited break from boring cycling raincoats. “Finally, a raincoat that also looks stylish!” and “The collection looks so good, it’s a waste to only wear them when it’s raining.”

BODYMAPPING

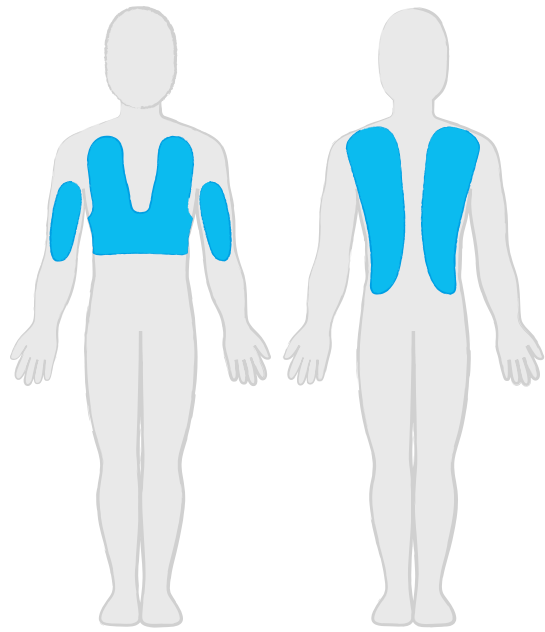

Research and development go hand in hand when making new and innovative products. Instead of repeating existing cycling kit patterns, we've dived into the body mapping principle. This is the principle that different parts of your body respond differently to activity. By mapping where your body feels cold more, or where you sweat more or less, we can construct and design a cycling kit that is adapted perfectly to your body's needs while cycling. When designing a cycling kit that truly optimises your performance, where do you need which fabrics? That was the question we've asked ourselves. And the answer is here, integrated in our upgraded collection items.

The blue and red areas highlight where the body first feels most cold and warm sensations, according to research we've found in literature studies. Highlighted in green is where you first feel sweat appearing on your body, while the yellow areas show where you sweat most. This is where things get interesting.

Sweating helps you to cool your body whilst cycling. Evaporation of sweat cools down the skin. We have positioned panels on the sweatiest parts of the body to boost the evaporation of sweat and thereby keeping your body cool in hot environmental conditions.

HIGHEST SWEAT RATE

COLD SENSATION

HEAT SENSATION

SWEAT SENSATION

ESSENTIAL COLLECTION

The Essential collection is our not-so-basic basics collection, with a loose or regular fit and at an attractive price point. We have simplified this collection to make it easier for customers to choose the right product for their needs, based on different types of weather. As for the wind jackets and wind bodies, we've added some extra colour options of our best-selling items.

Sustainability is a major topic in this collection. Besides adding even more recycled material, we've invested in the durability of our products. All sustainable items are part of our Greensphere collection, so making more sustainable choices in cycling clothing has never been easier.

Essential

THERMO JERSEY LS ESSENTIAL MEN

The fit, looks and comfort of a long sleeve, the functionality of a jacket. With this thermal cycling shirt you go warm and stylish on the road. Perfect for the cooler days or in the winter with an extra thermal layer underneath.

#EVERYDAYRIDING

ESSENTIAL BASE LAYER COLLECTION

Our base layers are the perfect choice to wear under your jersey year-round. The materials used wick perspiration away from the body, so you stay dry and keep warm effectively. Available with long or short sleeves, as well as sleeveless, all our base layers have Polygiene – an antibacterial treatment that prevents unpleasant odours.

This brochure lists the recommended retail prices. Subject to changes in model and price

Essential

EVERYDAY BASE LAYER SLEEVELESS

Perfect temperature regulation starts with layers. Layering starts with this seamless, sleeveless baselayer. Thanks to the Polygiene treatment your baselayer will stay fresh and odor free for longer. Ideal for an spring, fall or summer ride.

- Material: Polyamide, Polypropylene and Elastane
- Polygiene stay fresh: Permanent threatment against smell causing bacteria
- Seamless technology for optimum wearing comfort
- Thermo-regulating, breathable and fast-drying
- Strategically placed mesh structures for extra ventilation
- Optimized bike specific fit

PERFORMANCE BASE COLLECTION

The Performance collection consists of items formerly known as part of our Trend and Premium collections. To make this collection accessible to all cyclists, we've divided the products into two categories, a base and a premium collection. We have simplified this collection to make it easier for customers to choose the right product for their needs, based on different types of weather.

For mild weather, the Solid jersey is a great option for every cyclist. Compared to last year's version, we've added an extra elastic to the back pockets to prevent items from sliding, based on feedback we've received from our customers and clients. The Winter jacket is your go-to jacket for cold rides. Of course we've made sure that the colours of all items match perfectly with the seasonal colours and the other collection items.

Performance

SOLID JERSEY LS PERFORMANCE MEN

A long sleeve version of our popular Solid jersey. The soft, light and above all very stretchy fabric make this item the favourite of many riders. The seasonal colours ensure that you do not only ride comfortably and warm, but also stylish.

PERFORMANCE PREMIUM COLLECTION

The Performance collection consists of items formerly known as part of our Trend and Premium collections. To make this collection accessible to all cyclists, we've divided the products into two categories, a base and a premium collection. We have simplified this collection to make it easier for customers to choose the right product for their needs, based on different types of weather.

Compared to the Performance Base collection, an exciting innovation is the use of the body mapping principle for the premium items, focussing isolation on where warmth escapes the body and ventilation where it is needed most. We've developed all items together with the riders of Team Jumbo-Visma, who provide us with valuable feedback all year round. An absolute highlight of this collection are the Ultrasonic Welded Puffer jacket and body, that provides much needed warmth in the coldest of weather and matches the seasonal colours perfectly.

Performance

SEAMLESS JERSEY LS PERFORMANCE MEN

Comfort and freedom of movement on the bike take on a new meaning with the Seamless Jersey from the Premium collection. The shirt is soft, stretchy and warm, but also very breathable.

- Material: Circular Knit Body Mapped Polyamide

AGU 
#EVERYDAYRIDING

PREMIUM HELMET COLLECTION

The perfect cycling helmet is lightweight, ventilates well and of course provides the ultimate level of protection. At AGU we design and develop our helmets to guarantee a perfect fit, comfort, and safety. We've divided our collection into two, making sure we offer the right products to the right cyclist.

Our performance helmets live up to the highest standards of cyclists. With the Transsonic and Subsonic helmets, we have technically advanced helmets that make use of the latest findings in aerodynamics research. Of course, our best-selling Vigorous helmet is still available in both the normal and MIPS-version.

This brochure lists the recommended retail prices. Subject to changes in model and price

Essential

SUBSONIC HELMET

Are you looking for an extremely aerodynamic helmet that also excels in terms of ventilation? With the Subsonic AGU has an absolute champion in its range. It was developed in close cooperation with the Technical University of Eindhoven.

- Windtunnel proven design
- Airflow design for optimal ventilation
- Lightweight double in-mould helmet
- Direct dial system
- Y-buckles and straps
- Complies with the EN1078 standard

Size(s) **S 52-56 - L 57-61**

#EVERYDAYRIDING

PREMIUM GLASSES COLLECTION

We've improved our eyewear collection! You can now choose for sunglasses that live up to the demands of professional riders, with HD lenses and best-in-class specs, or a slightly scaled down version, with a simpler UV400 lens in the same frame.

This is our premium collection, all equipped with a hydrophobic coating and an Anti-Fog coating on the HDII lens. This makes rainwater bead up and roll off the lenses easily. Everything to prevent condensation. With an option for photochromic lenses, this range keeps your sight sharp and your eyes protected. The HDII lens makes sure you have a clear, extra sharp view in all circumstances. Making sure you see even more with, than without glasses.

This brochure lists the recommended retail prices. Subject to changes in model and price

Essential

SIX6 COLLECTION

The SIX6 heritage collection refers to 1966, the year AGU was founded. This collection is made for all cycling adventures. It's a unique design that expresses the desire to go outside, to ride a bike and explore the world around us. It has a classic look but is made of the newest fabrics and innovative techniques. With a kit from the SIX6 collection, you can make the most out of every ride. We have simplified this collection to make it easier for customers to choose the right product for their needs, based on different types of weather.

The collection has been enriched with multiple high-end technologies that were specifically developed for winter use by Team Jumbo-Visma. For mild weather, the Merino jersey is a great option for every cyclist. Compared to last year's version, we've added an extra elastic to the back pockets to prevent items from sliding, based on feedback we've received from our customers and clients. Our Venture bike bags and bikepacking collection match the colours and style of the SIX6 collection. You've got everything you need for your next adventure; are you ready?

VENTURE BIKE WEAR COLLECTION

Everyday can be an adventure. Going off the beaten track, creating your own freedom where the unknown can happen. And when it does, you need to be ready for it. Wearing the right gear is crucial to enjoying your adventure to the max. You can ride fast and far, cruise around at your leisure, camp out under the stars or just sit with a coffee or a cold beer.

From tight fitting ultra-functional bibshorts and jerseys, to baggy MTB pants, puffs and hoodies, to casual but technical chinos and even flannel bike shirts. No matter where you ride, what you ride or how you ride. Gravel, MTB, bikepacking, touring; we've got you covered.

Venture

AGU 
#EVERYDAYRIDING

VENTURE BIKEPACKING COLLECTION

Whether you're out riding for a weekend, a week or a month, the AGU bikepacking collection comprises everything you'll ever need to expand your riding horizon. With over 50 years of experience in cycling bags under our belt, this range was specifically designed by bike packers for bike packers, at an attractive price.

To highlight our rich heritage of making bike bags, we have given our complete bikepacking collection a vintage colourway. The quick and easy modular attachment system ensures these durable bags fit any frame. Let AGU lighten your load and open up those unbeaten paths for #everydayriding.

This brochure lists the recommended retail prices. Subject to changes in model and price

KNWU REPLICA COLLECTION

AGU and the Dutch cycling federation KNWU are joining forces for the next four years, with the Olympic and Paralympic Games of Paris 2024 as an absolute highlight. We are equipping the Dutch team with the fastest bike wear. In the coming years, AGU, the KNWU, NOC*NSF and TU Delft will work together intensively to further develop the fastest kit possible.

In addition to our partnership, we have several replica items of the KNWU kit available for every cyclist. Support the Dutch national team riders in style by wearing these comfortable items with the great team design and an excellent value for money.

AGU 
#EVERYDAYRIDING

LIFESTYLE COLLECTION

At AGU, we understand that the love for riding bikes can be exhausting at times. It's not always possible to spend day after day on a bike. For all moments off the bike, we want you to feel comfortable as well. We've made a selection of casual items so you can show your love for the bike at all times.

To make you feel even better when wearing these clothes: all casual items are made from a premium quality organic cotton and the sweater and hoodie mix the organic cotton with 100% recycled polyester. As such, these items are all part of the AGU Greensphere collection. Better for you and better for the environment!

This brochure lists the recommended retail prices. Subject to changes in model and price
