

PELTONEN

PELTONEN COLLECTION X 2023-2024

PELTONEN

PASSION FOR XC-SKIING

FINNISH SKI MAKING SINCE 1945

Peltonen was established in 1945 by a talented skier and craftsman Toivo Peltonen. Originally hand-crafted with manual tools from a single piece of wood, Peltonen skis quickly developed to an Olympic-winning level. In 2011 Peltonen invested into a new state-of-the-art production facility in Heinola – making it the world's most modern ski factory.

With almost 80-years of knowledge of ski making, Peltonen continues to invest in product development and bringing new innovative products to market.

FROM THE WORLD'S MOST MODERN SKI FACTORY

In our factory in Heinola, Finland, passion goes into producing our skis and always looking for new technologies to make our skis even better. With an annual production capacity of 100 000 pairs, the factory produces skis for race skiers, recreational skiers, newcomers to the sport as well as children. Our WCR collection skis are manufactured on a specifically race skis specialized manufacturing line. The quality is monitored on top-of-class "SkiSelector" measuring system.

PELTONEN SKI POLES COMPLETE THE RANGE

This season Peltonen brings a collection of Ski poles to the range. Wide range of ski poles offer options from World Cup level to occasional recreational skiing. Eye-catching design and well-thought-out functionality run through the range. Our best, competition poles Peltonen R1 and R1 Sprint fill the high standards of competing athletes with exceptional lightness, durability and swing.

FROM TRACKS TO TERRAIN: FIND YOUR PERFECT SKI WITH PELTONEN

Whether you count seconds on tracks or want to explore difficult terrains, Peltonen offers skis in different categories to fit your needs. Our race skiing collections WCR and Racing are for race skiers and active skiers looking for the best technologies and performance. Active and Outdoor categories on the other hand combine quality and functionality for the needs of a recreational skier. When terrains get more difficult or you want to get off the tracks, our backcountry collection will help you to enjoy the unexplored paths.

WCR

Our World Cup level skis are the choice for race skiers and active skiers who are looking for the best possible skis.

Manufacturing process uses best available technologies and materials to ensure the World Cup level quality. Available in different weather profiles.

SKATE SKIS

Peltonen Skate skis offer skis for racing and recreational skiers without forgetting the future champions. Our World Cup level ski, Supra X, is available in different weather profiles – for optimal performance in different weather conditions.

SUPRA X SKATE

Peltonen WCR skate ski with an improved Nomex Honeycomb Core construction combined with a reshaped tip and tail makes skiing more stable and relaxed. A stiffer front section of the ski increases gliding properties during uphill skiing. Core construction with a lower camber creates better glide in all snow conditions. This ski also comes with a new Fluor Free Nano High Speed base material that improves glide in higher speeds. The Supra X skate is also available with the Nano High Speed Wet base material for wet conditions.

Lengths
Base
Profiles
Flexes

181, 188, 193
Nano High Speed / WSB
Hard track / Universal track
Medium, Stiff, XStiff (193)

SUPRA C SKATE

The Supra C skate has several high-end qualities that can also be found in the WCR skis. A low profile Aircell core with an improved tip and tail gives a very comfortable and stable skiing experience. The universal profile with a racing level base material works perfectly in most snow conditions. Flexes available in uniquely wide range - also for heavy weight skiers.

Lengths	174, 181, 188, 193
Base	Nano High Speed
Profiles	Universal
Flexes	Medium, Stiff, Stiff+

SUPRA X LW SKATE

Peltonen Supra X LW skis provides World Cup level performance for junior skiers with many of the same top features found in WCR and racing collections. The LW skis are available for skiers up to 55 kg.

Lengths	153, 160, 167, 174
Base	Nano High Speed
Profiles	Universal
Flexes	Medium (153-174), Stiff (174)

SUPRA C LW SKATE

The Supra C LW is the first racing skate ski for the future champions. The high quality PRG 4100 base material helps to improve glide in all snow conditions.

Lengths	132, 139, 146, 153, 160, 167
Base	PRG 4100
Profiles	Universal

ACADIA SKATE

Excellent quality at an excellent price: Acadia is the lightest ski in its price category. The performance of Acadia even meets the requirements of a World-Loppet skier. Stiffnesses up to 120 kg make the Acadia a good choice for a diversity of skiers.

Lengths	167, 174, 181, 188, 193
Base	PRG 3600
Profiles	Universal
Flexes	Medium, Stiff

Nomex is extra light, Kevlar-reinforced honeycomb construction with top-class power transmission features. Due to the dynamic action of the construction it is used especially in race skis.

AirCell is a nanoepoxy reinforced cellular structure. This construction enables very light skis and it provides many top-class skiing features to active and recreational skiers.

AirChannel is a composite structure made of wood and glass fiber. This structure targeted towards recreational skiers offers easy skiability and enjoyable smooth skiing action.

CLASSIC SKIS

Whether you're looking for a world cup level classic skis or only getting to the sport – Peltonen classic skis are made with attention to detail so you can focus on the track. All models have lightweight construction using AirCell or Nomex technologies. Infra X is available in different weather profiles – for optimal performance in different weather conditions.

INFRA X CLASSIC

Peltonen WCR classic ski for classic race XC-skiing. An improved Nomex Honeycomb Core construction with higher profile gives more space for kick wax and less drag for better glide. In addition, the higher and more elastic wax pocket gives excellent, easier kick action without sacrificing glide. This ski comes with a new Fluor Free Nano High Speed base material which improves glide in higher speeds. The Infra X classic is also available with the Nano High Speed Wet base material for wet conditions.

Lengths
Base
Profiles
Flexes

188, 195, 202, 207
Nano High Speed / WSB / Infra zero
Universal / Cold
Medium, Stiff

UNIVERSAL/COLD - PROFILES

Long and low wax pocket that closes easily. Choose low wax pocket for cold and soft snow and a bit higher wax base for harder snow conditions.

WET/KLISTER - PROFILES

High wax pocket. Red Wet Snow Base (WSB) helps to channel excess water under the sole of the ski and provides better glide on wet snow.

INFRA C CLASSIC

Peltonen Infra C classic comes with the same easy to ski construction as the WCR classic skis. Very elastic wax pocket - less kick power is needed to compress grip zone. There is also a lot of space for kick wax, which reduces drag and increases the gliding properties of the ski. A universal profile with a racing level base material works perfectly in most snow conditions. Wide range of flexes - available also for heavy weight skiers.

Lengths | **188, 195, 202, 207**
 Base | **Nano High Speed**
 Profiles | **Universal**
 Flexes | **Medium, Stiff**

INFRA XLW CLASSIC

Peltonen InfraXLW is a classic racing ski for juniors. The super light Aircell Honeycomb core and PRG 4100 racing base guarantee excellent performance in various snow conditions.

Lengths | **153, 160, 167, 174, 181**
 Base | **PRG 4100**
 Profiles | **Universal**
 Flexes | **Medium (153-181), Stiff (174-181)**

ACADIA CLASSIC

A wide range of lengths and flexes makes Acadia a good training ski even for a World-Loppet skier. Stiffnesses up to 120 kg make the Acadia a good choice for a diversity of skiers.

Lengths | **181, 188, 195, 202, 207**
 Base | **PRG 3600**
 Profiles | **Universal**
 Flexes | **Medium, Stiff**

Nomex is extra light, Kevlar-reinforced honeycomb construction with top-class power transmission features. Due to the dynamic action of the construction it is used especially in race skis.

AirCell is a nanoepoxy reinforced cellular structure. This construction enables very light skis and it provides many top-class skiing features to active and recreational skiers.

AirChannel is a composite structure made of wood and glass fiber. This structure targeted towards recreational skiers offers easy skiability and enjoyable smooth skiing action.

G-GRIP™

GRIP AND GLIDE WITHOUT WAXING

G-Grip skis are based on Peltonen G-Grip™ nanotechnology. The skis are in their element in conditions where grip waxing is normally difficult – like coarse spring snow or glazed tracks. Grip and glide experience to fit the needs of a recreational skier without any grip or ski glide wax. G-Grip skis are easy to maintain, only wipe the base of your skis if dirty. The G-Grip coating stays good even after 2000km of skiing. Ideal for low-speed recreational skiing.

G-GRIP FUSE CLASSIC

Just grab your skis and go - no grip or glide wax needed. Bit shorter, easy to handle ski is made for beginners and recreational skiers. Made with light weight Aircell core. Sold together Rottefella Basic automatic binding.

Lengths | **160, 170, 180**
Base | **G-Grip coating**
Profiles | **Universal**

CRUISER CLASSIC

G-Grip Cruiser is developed as steady and comfortable entry ski and introduction to the world of xc-skiing. The Airchannel construction together with G-Grip treatment enables carefree skiing with no need for waxing. The G-Grip works best between +5- -10 degrees providing comfortable grip and skiing experience. Choosing Cruiser skis is simple: ski length 155 cm for skier up to 170 cm tall. The 170 cm ski is for skiers taller than 170 cm.

Width | **52 mm**
Lengths | **155, 170**
Base | **G-Grip coating**
Profiles | **Universal**

G-GRIP TIGER CLASSIC

Easy-going Tiger for waxfree action! A premium junior ski with attracting graphics, woodcap construction, sintered base and G-GRIP coating for fun, waxfree performance. Available also with Rottefella Start bindings pre-installed.

Lengths | **100-170 / 10 cm**
Base | **G-Grip coating**

SONIC STEP CLASSIC

Cool Sonic is the right choice for the first ski for children. Easy to ski for a beginner. Easy to use Rottefella Start bindings. Sonic comes with wax free step base.

Width | **45 mm**
Lengths | **100-160 / 10 cm**

SKIN

THE UNIQUE PELTONEN SKIN SKI

Peltonen Skin skis are designed specifically for optimal performance with skins. Equipped with 100 % mohair skins, Peltonen Skin skis provide great grip and glide on the tracks. With Skin skis you get as good glide as with waxed skis – without the need to wax. Add Rottefella Move binding to further improve your skiing experience.

**ROTTEFELLA
MOVE™
BINDING**

MOVING THE BINDING ON THE SKI IS AN EFFECTIVE AND EASY WAY TO ADJUST THE GRIP AND GLIDE. WITH MOVE™ SWITCH, YOU CAN MOVE THE BINDING WITHOUT REMOVING THE BOOT FROM BINDING.

BACKCOUNTRY

READY TO EXPLORE

When you want to find your own paths. Peltonen Backcountry skis are made for exploring and enjoying the nature, especially off the tracks. The light and narrowed tip on Metsä skis make it easy to lift them even in deep snow. Hunter skis come in handy when the terrains are challenging, and traditional backcountry skis get difficult to handle. Pair both Metsä and Hunter skis with the Deep Snow poles, designed for deep snow and difficult conditions.

METSÄ BC

ROJFELLA
TECHNOLOGY

A special ski with two different base options for deep snow skiing: Step and Skin. Very flexible tip for good floatation on deep powder snow. Perfect for hunting, fishing or ski touring. Handmade in Finland.

Width | **70 mm**
Lengths | **210, 230, 250, 270**
Base | **Step, Skin**

NIS
NORSCHEIDEN SYSTEM

REPLACEMENT SKIN

The skin changing interval is about 1500-2000 km under normal conditions, the interval can be shorter under abrasive conditions. For Metsä and Hunter skis.

Lengths | **499 mm, 599 mm**

DEEP SNOW POLE

Carbon fiber reinforced ski pole for deep snow. Thermo handle.

Lengths | **120 - 160 cm / 5 cm**
Basket | **14 cm**

SKI POLES

Wide range of ski poles from our World Cup level ski poles to ski poles for slower paced recreational skiing. The new Peltonen ski poles bring eye-catching design and well-thought-out functionality.

RX RACE RACE STRAP AND BASKET

SPRINT R1 WCR

RX RACE FULL CARBON XT 60 LIGHT SWING

R1 sprint is well suitable also for heavy weight skiers. Also available in customizable length.

- Lengths 130-185/2,5 cm
- Shaft 100% XT-60 Carbon
- Basket RXrace 8,5
- Grip RXrace cork
- Stiffness 2.6

R1 WCR

RX RACE FULL CARBON XT 60 LIGHT SWING

R1 is extremely light and exceptionally durable skiing pole for racing. Also available in customizable length.

- Lengths 130-185/2,5 cm
- Shaft 100% XT-60 Carbon
- Basket RXrace 8,5
- Grip RXrace cork
- Stiffness 2.4

R2

RX RACE FULL CARBON
HM 100
HIGH MODULUS

Exceptionally durable, made of 100 % high modulus carbon fiber. R2 skiing pole fits both for race skiers and active skiers. Also available in customizable length.

Lengths	135-175 cm
Shaft	100 % HM 100 Carbon
Basket	RXrace 8,5
Grip	RXrace cork
Stiffness	2.3

R3

RX RACE FULL CARBON
HM 100
HIGH MODULUS

R3 holds many features of a top-skiing pole in a very competitive price. Fits perfectly to active skiers skiing long distances. Made of 100 % high strength carbon fiber to ensure enough stiffness. Also available in customizable length.

Lengths	135-175 cm
Shaft	100 % HS 100 Carbon
Basket	RXrace 8,5
Grip	RXrace cork
Stiffness	2.1

RACE SKIING POLES FOR FUTURE CHAMPIONS

R1 TIGER

RX RACE CARBON
COMPOSITE

A pole designed specifically for junior racers. 90 % carbon fiber.

Lengths	110-140 cm
Shaft	90 % Carbon
Basket	RXrace 8,5
Grip	RXrace cork
Stiffness	1.9

R3 TIGER

RX RACE CARBON
COMPOSITE

Excellent skiing pole for actively skiing young and starting race skiers. Great quality for the price. 50 % Carbon fiber shaft.

Lengths	110-140 cm
Shaft	50 % Carbon
Basket	RXrace 8,5
Grip	RXrace cork
Stiffness	1.6

WIDE RANGE OF SKIING POLES FOR RECREATIONAL SKIERS

ZENITH

80% CARBON

Zenith skiing pole offers many top-qualities on a reasonable price 80 % carbon fiber shaft gives good stiffness.

Lengths
Shaft | 120-170 cm
80% Carbon

ACADIA

60% CARBON

Light, 60 % carbon fiber composite pole fits the needs of an active skier. Due to its stiffness, this pole work well for skate style.

Lengths
Shaft | 120-170 cm
60% Carbon

ASTRA

40% CARBON

Astra in an excellent choice for recreational skier. The shaft is made of 40 % carbon fiber and is therefore also suitable as skate skiing pole for lighter skiers.

Lengths
Shaft | 120-170 cm
