IDEA SKI BOOT

OVERVIEW

Idea ski boot will keep the foot dry, warm and comfy. The shell is coated with a sealing layer that keeps water and snow out. The anatomically padded liner collects the natural heat of the foot while skiing and keeps the foot warm during breaks. Altogether, the boot flexes with the foot and wraps it for maximum comfort.

LINER BELLOWS SYSTEM "LBS"

The staple feature of IDEA's liner is a unique adjusting system.

The Liner Bellows System has been devised to avoid any uncomfortable pressure through all parts of the foot. The bellows allows the liner and shell to work in tandem to produce a fit that is accurate and comfortable the natural/resting position of the liner is with the bellows extended to the largest size (PIC. A), while shortening the shell makes the bellows compress (PIC. B) into smaller sizes

PIC.A

PIC.B

LENGTH GROWTH COMPENSATOR

The "6 in 1" system is unbelievably easy to use: to select the right length you just need to rotate the lever placed on the lower part of the boot (close to the heel) to the chosen size.

1. Open the buckles of your boot;
2. Rotate the lever to reach the desired size;
3. Close the lever to the proper peg.

4
