

A scenic photograph of two cyclists riding across a stone bridge. The bridge has a blue metal railing and is set against a backdrop of a valley with greenery and a large, rocky mountain peak in the distance. The sky is overcast with soft, diffused light. The text 'Spring/Summer 2025' is overlaid in white on the lower part of the bridge.

Spring/Summer 2025

AGU 

We've got you covered

At AGU, we encourage people to ride their bikes, because it is fun, healthy and sustainable. We want every cyclist to ride in comfort, to enjoy cycling to the max. For those cycling their first miles, to the Tour de France winner. For the ones who cycle to work and offroad adventurers. We are here for all cycling heroes, with every peddle stroke, we support them with products they can trust. Our high-quality products are thoughtfully designed, with smart solutions for comfortable cycling. From cycling wear to outer wear and bike bags, our complete range is for every cyclist.

In all types of weather and on any bike, every day
We've got you covered.

Dutch Cycling Experts

Since 1966

We are a Dutch brand and we've been making cycling gear since 1966. From the very beginning we endeavored to help people use their bikes as often, and with as much freedom and ease of use as possible with bike wear, rain wear and bike bags. Cycling is in the very DNA of the Dutch culture. We know all the challenges a cyclist can face, and we work on the best solutions to each one of them, every day.

Quality & innovation

We are at the forefront of innovation in cycling gear. From advanced materials and innovative designs, we develop the most aerodynamics clothing for the best riders in the world. We push the boundaries of cycling gear to continuously improve performance, comfort and sustainable solutions.

We strive for the best. Whether it's developing the fastest clothing, ensuring the highest quality in every product or minimizing the impact on the environment, we set the standard for excellence in cycling gear.

From the founding of AGU in 1966 we have introduced a host of innovative products. Including the first lightweight bike bags, the first carbon fiber chamois pad, the award-winning Original rainsuit, the fastest kit possible for the professional riders in the Worldtour peloton and much more.

Sustainability

We believe **cycling** can make a crucial contribution against climate change and make cities healthier and more livable. We want to make it easier, smarter, and more attractive to make that sustainable choice to get on your bike every day with products that are produced in the most sustainable way available to us at any given time. Now, more than ever, we need people to get on their bikes. Every day. Everywhere.

Quality is a key factor in our vision of sustainability. Because quality works towards durability, i.e. the life span of a product. For us at AGU, quality is sustainability.

Next to the quality of our products, the quality of the raw materials is just as important to us. Sourcing the best quality recycled fabrics and other **sustainable materials** for our products is key in our product development process. We keep on innovating by offering the most sustainable solutions. We developed the Upcycling collection. With a minimal footprint, we turned excess inventory Rainwear, Bikebags and Team Jumbo-Visma replica jerseys into unique products. Handmade in Holland.

Our undyed collection showcases our commitment to sustainability by eliminating the use of dyes in production. By forgoing dyeing, bleaching and washing processes, we're minimizing our carbon footprint and preserving natural resources.

At AGU, sustainability isn't just a goal; it's a journey we're deeply committed to.

2025 Collection theme

Reflect & Rebalance

At AGU, we are deeply committed to riding bikes and to the impact that each ride has on us. It goes beyond the physical realm, reaching into our minds and spirits. When developing our SS25 collection, we decided to take a little break. It felt like pressing the pause button in a world that is moving faster and faster. By taking that moment, we realized that we all need to take a step back sometimes in order to move forward. And so, the 'Reflect and Rebalance' collection theme was born. In a world that is moving faster and faster, change is the only constant.

If we talk about change, sustainability is on the top of our priority list. This summer we will use more recycled materials, natural fabrics and natural dyeing techniques. This extra step is in line with our commitment to a greener future. We change if it leads to something better. Better for us as humans and better for the world around us. We pedal in the right cadence to stay present in the moment. To us, this is what cycling is all about.

When you hop on your bike, you enter a state of flow. You leave everything else behind. Along the way you find peace, joy and connection. Connection with yourself, with nature and with

others. Whether commuting through city streets, speeding across fields, or exploring mountain trails, it brings us to the present. It brings us back to ourselves. It takes us into the flow of the ride.

To enhance the ride for every type of cyclist, we introduce three exciting sub-themes: 'Indigo Dream', 'Future Ride' and 'A Summer of 100 Sunsets'. They all invite you to jump on the bike and find your flow of the ride.

2025 Collection theme

FuturRide cycling collection

We welcome you to a world where cities and landscapes are in a continuous state of evolution, giving rise to a new generation of cyclists. The FuturRide collection draws inspiration from these individuals and their aspiration to shape the future of transport by cycling.

No matter how advanced technologies are becoming, while we enter into worlds of fantasy and the metaverse, we must also find ways to rebalance and engage with reality. We feel the energy of the townscape and as we strive for balance, we appreciate the freedom that cycling offers together with the ability to navigate the roads with ease.

The colors such as Lilac, Green and Coral in this collection symbolize the vibrant colors of the world of the future. With the FutureRide Cycling Collection we challenge everyone to rethink priorities and find balance between the fast-paced digital world and everyday reality. Let's find our flow, ourselves, in every ride.

Bibs & Chamois Pads

Discover the next level of cycling bibs and shorts with our newly revamped SS25 Collection. We've reimagined our cycling bibs and shorts to offer you the ultimate blend of cutting-edge technology and contemporary style.

Designed with the latest innovations used by our pro riders, the SS25 Collection translates pro performance into consumer-friendly versions. Whether you're at the top of your game or just starting out, our bibs caters to riders of all levels.

So from our premium range to our Essential bibs and shorts, all have undergone a complete transformation. Experience enhanced comfort, improved fit, and superior durability with every ride.

We've prioritized sustainability without compromising on performance. All our bib fabrics across the entire collection are crafted using the latest sustainable and high-tech materials. Ride with confidence knowing you're making an eco-friendly choice without sacrificing quality.

But that's not all! We've updated our chamois with new colors and improved functionality. Experience a new range of modern, high-functionality chamois designed to provide maximum comfort on every ride.

Upgrade your cycling wardrobe with the SS25 new bibs and redefine your cycling experience!

2025 Collection theme

Indigo Dream

Allow us to unveil our first Breakaway collection, with the enchanting theme Indigo Dream. When in the flow of the ride, we dream about a better future. We reflect on today's challenges and possibilities and take inspiration craftsmanship of making denim. We translate this century old craftsmanship to the here and now with sustainable production methods. We do so by dyeing recycled fabrics with the Nano Earth Dye technique.

The use of this Earth Dye is a sustainable dyeing technique that we started using in our SS24 collection and we will keep using for future collections. Our Earth dye process replicates the gradual fading that occurs in your favorite jeans over time, resulting in a beautifully weathered appearance. This creates a unique washed-off denim look that refers to the timeless allure of indigo. The result? A one-of-a-kind collection that honors tradition and our rich heritage while keeping up with today's trends.

Breakaway

2025 Collection theme

Summer of a 100 sunsets

Long summer evenings are perfect to get the day off your chest, with a cool summer breeze at your back and the sun setting slowly but surely. When you reach the top of a climb and see the sun sinking behind the mountains. As the day gives way to dusk, we ready ourselves for the embrace of night, finding a moment of peace. Cruising on your gravel bike through the forest or the dunes, with the sky coloring a little more orange with every pedal stroke. Embracing the spirit of the adventurous cyclist, inspired by the freedom of untamed exploration.

With a carefully curated color palette of warm oranges that capture the remarkable summer sunsets, earthy tones that evoke tranquility and deep blues that bring a sense of serenity and reflect endless horizons. The new products combine style, functionality and sustainability. With an imagination-inspiring color palette, we capture the wonder of every sunset and challenge you to complete your Summer of a 100 Sunsets.

2025 Collection theme

Reflect & Rebalance

At AGU, we are deeply committed to riding bikes and to the impact that each ride has on us. It goes beyond the physical realm, reaching into our minds and spirits. When developing our SS25 collection, we decided to take a little break. It felt like pressing the pause button in a world that is moving faster and faster. By taking that moment, we realized that we all need to take a step back sometimes in order to move forward. And so, the 'Reflect and Rebalance' collection theme was born. In a world that is moving faster and faster, change is the only constant.

If we talk about change, sustainability is on the top of our priority list. This summer we will use more recycled materials, natural fabrics and natural dyeing techniques. This extra step is in line with our commitment to a greener future. We change if it leads to something better. Better for us as humans and better for the world around us. We pedal in the right cadence to stay present in the moment. To us, this is what cycling is all about.

When you hop on your bike, you enter a state of flow. You leave everything else behind. Along the way you find peace, joy and connection. Connection with yourself, with nature and with

others. Whether commuting through city streets, speeding across fields, or exploring mountain trails, it brings us to the present. It brings us back to ourselves. It takes us into the flow of the ride.

To enhance the ride for every type of cyclist, we introduce three exciting sub-themes: 'Indigo Dream', 'Future Ride' and 'A Summer of 100 Sunsets'. They all invite you to jump on the bike and find your flow of the ride.

Urban Outdoor

City Slicker Rain Jacket Urban Outdoor

Beemster Bike Basket Fast Lock

A contemporary classic for a broad target audience: the fine-mesh and coarse-mesh metal baskets from Fastrider are extensively and gladly used by large groups of cyclists who value affordable functionality and style. Although metal bike baskets have now achieved the status of a classic, a lot has changed in the intervening years: in terms of attachment (many baskets are easily removable), diversity (various sizes, coarse or fine mesh), material (special coatings to counter the effects of weather) and ease of use (some models are equipped with combination locks). What all the baskets have in common is the combination of luxury, practicality and a modern appearance.

Size: **24 x 24 x 34**

- Made of coarse meshed metal
- The basket is detachable
- With handle
- Including the Fastlock holder for mounting at your bike
- Especially suitable for Ahead stems with a diameter of 22.2-28.7mm
- Load capacity max. 5 kg

CLICK'N GO®

As the name says: click and go! To make the bikebag and therefore every ride even more convenient, we have developed our own fastening system: Click'nGo.

Our product developers have put ease of use at number one and have started designing from there. The result? A premium attachment system that allows you to click the bag onto the bike and remove it from the bike with one hand movement.

HOW TO CLICK THE BAG ONTO YOUR BIKE

The Click'nGo system is made to easily attach a bikebag to almost any luggage carrier, following three steps:

1. Adjust the hooks in width.

2. Tighten the screws to the tube thickness of your luggage carrier.

3. Place the Swinglock in the correct position at the bottom.

CLICK'NGO COMPONENT

The Click'nGo mounting system consists of several parts. The two **Railed Hooks** (mounting hooks) are adjustable in width on the **Top Rail**. At the top of the hooks is a handle with which the bag can easily be clicked on and off the bike.

The **Swinglock** is located in the middle of the bag. This keeps the bag in place along the side of the luggage carrier, so that it cannot flap in the wind. At the bottom of the bag is an extra protective edge, the **Guard Rail**.

In addition to the Railed Hooks, we also have the **Fixed Hooks**, which are not adjustable in width. Finally, there is the **Lockring**. This is, as it were, a lock for your bicycle bag. It is a small iron ring that can be screwed onto the bikebag, so that the bag cannot simply be taken off the bike.

SPARE PARTS

If a part of the Click'nGo system unexpectedly needs to be replaced, it can be easily reordered and replaced.
