COLLECTION 2025 / 2026

CHALLENGE. EVERY DAY.
tradition

At Alpina, we are deeply rooted in nature, originating from the picturesque town of Žiri. For decades, our passion for craftsmanship, innovation, and excellence has driven us to create footwear that embodies both tradition and modernity. From our streamlined production facilities, we maintain complete control over every step, ensuring the highest standards of quality while continuing to invest in cutting-edge technology and aesthetic design.

Our journey has earned us the trust of Olympians, world champions, and World Cup winners in cross-country skiing and biathlon, with our footwear being an essential part of their success. This dedication to elite performance is evident in our entire range of sports and walking shoes, delivering unparalleled comfort, support, and durability.

Behind each pair of Alpina footwear lies the expertise and devotion of skilled craftsmen who blend traditional handmade techniques with modern innovation. As we celebrate over 75 years of experience, we are proud to be at the forefront of a new era in footwear manufacturing, guided by our vision to be a respected global leader, improving everyday life through comfort and excellence.

Our mission is simple yet profound: to provide people everywhere with the freedom and joy of motion. At Alpina, footwear is not just an accessory – it's a way to enhance life, offering comfort, innovation, and timeless elegance in every step.

Welcome to Alpina. Welcome to a new era in footwear.

FEATURES

WIDTH

Boot width, or last width, refers to the measurement across the widest part of the forefoot. It determines how snugly or loosely the boot fits around the foot. Narrow widths provide a tighter, performance-oriented fit, while wider widths offer more room for comfort.

- NARROW**
- Superior control and stability for advanced outdoor enthusiasts.
 - Reduces internal foot movement for a more connected feel.
 - Ideal for people with narrow feet or seeking a high-performance fit.

- MEDIUM**
- Suitable for a wide range of foot shapes.
 - Balanced comfort and control for versatile skiing.
 - Ideal for skiers who want both performance and comfort.

- WIDE**
- Comfortable fit for wide feet, reducing pressure points.
 - Allows more natural foot movement without sacrificing stability.
 - Ideal for recreational skiers or those needing extra foot space.

VOLUME

Boot volume describes the overall space inside the boot, including both the width and height of the instep and the room around the foot. Low-volume boots fit more snugly for precise control, while high-volume boots provide more space for comfort, especially for those with larger or higher-arched feet.

- LOW**
- Enhanced foot control for advanced skiers.
 - Improved power transfer for precise movement.
 - Ideal for people with narrow feet or seeking a tight, responsive fit.

- MEDIUM**
- A balance of comfort and control for varied terrain.
 - Suitable for most foot shapes.
 - Ideal for intermediate users or those seeking all-day comfort.

- HIGH**
- Maximum comfort for wider or higher-volume feet.
 - Reduces pressure points and fatigue on longer trips.
 - Ideal for outdoor enthusiasts who prioritize comfort over high performance.

FIT

The right fit enhances your experience by providing the appropriate level of comfort, support, and control based on your activity style and level. Whether you prefer the relaxed feel of Comfort boots, the balanced support of Fitness boots, or the precise fit of Performance boots, selecting the right fit ensures you get the most out of your footwear.

- COMFORT**
- Extra comfort for outdoor enthusiasts with wide feet.
 - Reduces pressure and hotspots for prolonged comfort.
 - Ideal for recreational use or those prioritizing comfort over precision.

- FITNESS**
- Comfortable fit for a wide range of foot shapes.
 - Combines support with comfort for all-day use.
 - Ideal for intermediate skiers or those seeking versatility.

- PERFORMANCE**
- Maximum control and precision for technical outdoor activities.
 - Reduces foot movement for greater stability.
 - Ideal for people with slim feet or seeking a race-like fit.

TECHNOLOGIES XC

VCP

VOLUME CONTROL PLATE: personalized Footwear Experience

Introducing Alpina's Volume Control Plate (VCP), an engineering marvel placed under the insole to fine-tune your boot's volume. Every foot is different, and the VCP allows you to customize the left and right foot independently. Adjust for a perfect fit that provides optimal comfort and support. If you need more space, removing the plate is easy. Experience a personalized fit with the VCP designed to accommodate the unique shape of your feet.

NON PVC

Eco-Conscious Durability

At Alpina, we emphasize sustainability in every product. Our non-PVC cross-country boots are made from recycled polyester and TPU, materials that offer the same durability as PVC while being significantly more eco-friendly. Choosing these boots helps you reduce your ecological footprint and support our green initiatives. We proudly offer footwear that cares for both you and the planet.

ACTIVE GRIP

Enhanced Classic Skiing Experience

At Alpina, we understand that the Skate and Classic techniques require distinct connections between your feet and skis. For an optimal Classic technique experience, our solution, developed through decades of research, is the ACTIVE GRIP technology. The 10mm offset of the front metal bar on the Alpina PRO CLASSIC sole maximizes the efficiency of every kick. With Alpina Active GRIP technology, you'll enjoy a superior Classic technique skiing experience like never before.

FREE HEEL TECHNOLOGY

Optimal Comfort and Performance for All Terrains

Extensive research and testing have shown that feet move uniquely during cross-country skiing and hiking, and our boots are designed to accommodate these movements. Alpina "Free-Heel" technology features a specially shaped heel counter, providing adventurers with maximum comfort and performance. This unique design and manufacturing process ensure your feet enjoy freedom and support at every moment, no matter the terrain.

VARIO

Our high-end models feature elastic tape inserts that allow the gaiters to adapt to a variety of lower leg shapes.

ULTRA LIGHT

Enhanced Racing Experience

Lightweight boots boost speed, agility, and energy efficiency. By reducing the weight of each step, they allow faster strides and better power transfer. Our commitment to creating the best and lightest XC racing boots is reflected throughout our entire collection, giving outdoor enthusiasts enhanced performance and endurance on every level.

MADE IN EUROPE

European Craftsmanship: handmade to the Highest Standards.

Crafted in Europe, our footwear represents the pinnacle of handmade production, demanding exceptional levels of craftsmanship and shoemaking expertise for unmatched quality.

CONSTRUCTION

We design boots tailored to the needs of skiers, varying construction for lightweight breathability for competitors and warmth and stability for back-country explorers, ensuring top performance for every user.

RACING ELITE

One-piece full-carbon chassis and cuff, split racing sole tip and heel glued to the chassis, anatomic, ultra-lightweight, and racy inner shoe, breathable, water-repellent, ultralight Alpina Elite Gaiter.

Lightweight performance: The full-carbon construction ensures maximum energy transfer and precision, making this ideal for competitive racers.

Comfort and fit: The anatomic inner shoe provides a snug, race-oriented fit for improved control and reduced fatigue.

Protection and breathability: The breathable and water-repellent Alpina Elite Gaiter keeps feet dry and comfortable, even in harsh conditions.

PRO SOLE

Constructed on the sole instead of the chassis, equipped with Alpina PRO Soles, materials vary from full-carbon to TPU, optimized for performance.

Variety of performance options: With a range of materials, these boots cater to different performance needs at various price points, making them accessible to both competitive and recreational skiers.

Durability and support: ALPINA PRO SOLES offer durability while maintaining a strong connection between the skier and the snow for improved stability and power transfer.

TOURING PRIME

All Touring shoes use Alpina Touring Glued construction and combine Alpina or Roteffela outer soles. The specific of this glued construction is great comfort and isolation throughout everyday use while staying price-performance oriented.

Enhanced comfort: The glued construction and integrated heel counter ensure that the boot feels comfortable even during extended use.

Insulation for warmth: The design provides effective insulation, making these boots ideal for everyday use in colder temperatures.

Durability for touring: This boot is designed for everyday use, offering a balance of comfort and functionality for touring skiers.

BC BOOTIE PRO

Full bootie construction with a 360° design, integrated TPU heel counter, water-repellent, breathable, and cold-insulated.

360° protection: The full bootie construction wraps the foot, offering complete protection against cold, moisture, and external elements.

Warmth and comfort: Excellent insulation ensures warmth, even in harsh winter conditions.

Breathability and water repellency: The breathable materials maintain foot comfort by preventing moisture buildup, while water repellency keeps feet dry.

BC PRIME

Constructed with multiple layers of carefully selected materials, stitched from the base inside out, with a heel counter, provides structure, insulation, water protection, and breathability.

Durable construction: The multi-layered materials offer a robust boot structure, perfect for backcountry conditions.

All-weather protection: Water protection and insulation ensure the foot stays warm and dry, making these boots great for off-trail exploration.

Breathable comfort: The breathable design prevents overheating, even during intense activity.

FLEX

Flex refers to how much a boot's sole bends, impacting performance across activities. A stiffer flex offers more support, ideal for skating and demanding terrains, while a softer flex allows a natural stride, perfect for classic skiing. Medium flex provides balance for backcountry and double poling, delivering both flexibility and control. Choosing the right flex enhances power, comfort, and stability for each specific technique.

SOFT

Graceful and Flexible

A soft flex sole is perfect for classic skiing. It offers a smooth, forgiving stride, making it easy to handle various terrains. This design provides comfort and precise control for cross-country skiers as they glide through snow effortlessly.

MEDIUM

Adaptable and Versatile

Medium flex soles are perfect for outdoor adventures and double-poling techniques. They offer the right balance for cross-country skiing, allowing you to tackle diverse terrains with ease while maintaining speed and control on trails.

STIFF

Solid and Powerful

A stiff flex sole is essential for skating techniques. It provides the rigidity and responsiveness needed for efficient, forceful strides, giving skaters the foundation to maximize performance and speed on the snow.

PERFORMANCE XC

CUFFS

Cross-Country Skiing Ankle Support

Cross-country skiing requires different levels of ankle support. Skating demands strong lateral support for maximum performance, while classic skiing benefits from ankle flexibility. Combi boots offer versatility for both techniques, with ergonomically designed cuffs providing a balance of rigidity and comfort, ensuring optimal performance across various skiing styles.

ALPINA ELITE SKATE/DUATHLON **Material: Full Carbon**
The full carbon cuff is ultra-lightweight, providing maximum stiffness and lateral responsiveness for superior skating performance. EVA padding ensures all-day comfort, and the power strap offers a customizable fit with excellent ankle grip.

ALPINA PRO SKATE/DUATHLON **Material: Pebax and Carbon**
The combination of PEBAX and carbon reduces the boot's weight, enhancing functionality and durability. The solid PRO Cuff delivers better torsional stability and an improved stance for optimal skiing posture.

ALPINA PRO JUNIOR SKATE/DUATHLON **Material: TPU and Carbon**
TPU and carbon construction make the boot lighter and more durable. The solid PRO Cuff provides young skiers with better torsional stability and a secure stance for developing skills.

ALPINA ELITE RS **Material: TPU and Carbon**
Designed for rollerskiing, this full carbon cuff is lightweight and offers maximum stiffness for quick lateral movements. EVA padding ensures comfort, and the power strap provides an adjustable, secure ankle grip for high performance.

ALPINA RACE **Material: TPU and Glass-Fiber**
TPU and glass-fiber construction lightens the boot while increasing its functionality and durability. The solid RACE Cuff enhances torsional stability, ensuring better posture and stance for effective power transfer.

ALPINA TEMPO **Material: TPU**
Thermoplastic polyurethane (TPU) provides good stiffness and lateral stability, while the EVA padding and a power strap provide superior comfort and adjustable ankle grip.

HEEL COUNTERS

The heel counter is a critical component for boots, providing essential support for the heel and ankle. It ensures the foot remains in place during skiing, improving control, and performance, and preventing injuries.

ALPINA ELITE SKATE CHASSIES **Material: Full Carbon**
The Elite SKATE chassis, featured in World Cup-level boots, is a single-piece full carbon construction that integrates the sole and heel counter. It provides unmatched torsional stability, improving power transfer and reducing the risk of injuries. The ultra-lightweight design, combined with FREE-HEEL construction, adapts to various heel and foot shapes for personalized comfort and reduced heel pressure.

ALPINA ELITE CLASSIC CHASSIES **Material: Full Carbon**
Designed for World Cup racing, the Elite CLASSIC chassis is a single-piece full carbon construction, providing superior torsional stability and power transfer. The FREE-HEEL construction reduces heel pressure and adapts to different foot shapes, offering a custom fit and reducing injury risk for classic skiing.

ALPINA PRO SKATE **Material: Carbon**
The PRO SKATE heel counter is made entirely of carbon, providing lightweight and torsional stability. The FREE-HEEL system adapts to different heel and foot shapes, offering a secure fit and reducing pressure during high-intensity skating.

ALPINA PRO CLASSIC **Material: Carbon and TPU**
The injected carbon heel counter is solid and durable. It ensures better torsional stability and stance position. 'Free heel' provides a good grip for any heel or foot shape.

ALPINA COMP SKATE **Material: Carbon and Pebax**
Reaching for the best and lightest, but wishing to be more accessible to a wider range of consumers. It still offers lightweight construction, and gives you high performance, functionality, and durability. 'Free heel' provides a good grip for any heel or foot shape.

ALPINA COMP CLASSIC **Material: TPU**
Premium thermoplastic polyurethane heel counter, with high level of stiffness and low weight provides a good grip and a stable foothold in the heel. 'Free heel' construction adapts to the various foot shapes and heel volumes.

ALPINA RACE SKATE/CLASSIC **Material: TPU and Glass-Fiber**
Premium thermoplastic polyurethane heel counter with glass-fibre, with high level of stiffness and low weight provides a good grip and a stable foothold in the heel. 'Free heel' construction adapts to the various foot shapes and heel volumes.

ALPINA TEMPO SKATE/COMBI **Material: TPU**
Thermoplastic polyurethane heel counter provides a good grip and a stable foothold in the heel.

ALPINA THERMO MOLDED BC **Material: TPU**
Premium thermo-molded material strategically integrated into the heel and ankle areas of the boot's structure. This innovation is designed to significantly bolster core stability, ensuring your confidence and support on challenging terrains.

ALPINA THERMO MOLDED **Material: TPU**
Material incorporated within the heel section of the boot's construction to enhance fundamental stability.

MIDSOLES

Midsoles define the shoe's flex, feel, and power, helping you reach speed while staying stable. They enhance control in classic technique and deliver power in sprints. Different materials and shapes ensure the perfect performance for each shoe.

	MATERIAL	STIFFNES	WEIGHT
ALPINA ELITE SKATE	Carbon and PEBAX (World cup Technology)	HARD	ULTRA LIGHTWEIGHT
ALPINA ELITE CLASSIC	TPU (World cup Technology)	SOFT	ULTRA LIGHTWEIGHT

PERFORMANCE XC

OUTSOLES

Outsole type and construction are chosen individually for each boot based on its features and functional requirements. We have used years of experience and knowledge from our R&D department and years of collaboration with World cup athletes to develop Alpina outsoles for both Skate and Classic techniques with specific characteristics. We are happy to choose the best options for every shoe.

ALPINA ELITE CLASSIC CHASSIS With integrated split Classic sole
Material Chassis: Full Carbon
Material Sole: TPU

Extremely light anatomic and ergonomic single-piece carbon-made soft, pliable sole flex chassis construction with directly integrated NNN compatible Classic toe & heel plate. The chassis construction provides maximum longitudinal stability, superior responsiveness, and power transmission by the foot to the ski, with "FREE-FEET" & adaptable heel pocket construction for minimum heel stress and optimal foot fit.

ALPINA ELITE SKATE X Material Chassis: Full Carbon
Material Sole: TPU

Rottefella SkateX: Precision Design for Enhanced Performance Engineered specifically for skate skiing, Rottefella's SkateX introduces a groundbreaking system that surpasses the traditional NNN binding. Featuring a reinforced carbon fiber chassis, it delivers superior lateral stability and balance. Optimized for efficient energy use, the SkateX system ensures smooth, powerful strides, making it ideal for high-performance skating on demanding courses.

ALPINA ELITE SKATE ONE-PIECE FULL CARBON With integrated split Skate sole
Material Chassis: Full Carbon
Material Sole: TPU

Extremely light anatomic and ergonomic single-piece carbon-made stiff sole flex chassis construction with integrated NNN compatible Skate toe & heel plate. The chassis provides maximum longitudinal stiffness and lateral stability, superior lateral responsiveness, and power transmission by foot to the ski, with "FREE-FEET" & adaptable heel pocket construction for minimum heel stress and for optimal foot and ankle fit.

ALPINA PRO CLASSIC Material: TPU

The specially designed sole for classic skiing features an NNN-compatible pivot point shifted 10 mm forward for a more efficient and powerful push-off, improving ski-to-snow contact. The thin-layer construction ensures a lightweight sole, while the low heel and 90-degree forefoot design provide optimal soft flex for enhanced comfort and performance.

ALPINA PRO SKATE Material: TPU

The specially designed outsole for skate skiing features a thin-layer construction for a lightweight feel, along with a high heel and 45-degree angled forefoot for optimal stiff flex. The NNN-compatible pivot point is slightly repositioned under the big toe, enhancing efficiency and delivering a stronger, more precise push-off.

ALPINA DYNO-PLATE Material: PEBA + Carbon Fibers

DYNO-PLATE is an injection-molded plastic panel designed for a high dynamic response to bending. To keep the plate thin and lightweight, carbon fibers are added, further enhancing its flexibility and responsiveness. This blend of plastic and carbon fiber has proven to be the ideal combination for achieving maximum dynamic response. DYNO-PLATE panels are integrated into both the ALPINA PRO CLASSIC and ALPINA PRO SKATE outsoles, significantly boosting the dynamic performance and responsiveness of each stride in both SKATE and CLASSIC ski boots.

ALPINA PULSE 1.0 Material: TPU

PULSE soles are designed to fit the NNN system, ensuring compatibility with cross-country ski bindings. Their neutral design, balancing the height of the heel in relation to the metatarsal or forefoot, provides excellent stability and a well-balanced stance. The large walking surface enhances control and support, making them ideal for both diagonal and gliding cross-country skiing techniques.

ALPINA PULSE 2.0

Material: TPU

PULSE 2.0 outsoles upgrade the functionality of the previous generation. They maintain the neutrality of the design in terms of their universality or suitability for both diagonal and skating running techniques on the one hand, while on the other hand they offer improved functionality in terms of flex and flexural strength. The walking surface remains large, allowing a firm stride both on and off skis.

ROTTEFELLA T4

Material: TPU

Efficient and Reliable ROTTEFELLA T4 Ski Sole. The ROTTEFELLA T4 sole, made from thermoplastic polyurethane, combines lightness with durability and cold resistance, enhancing cross-country skiing performance. Its flexibility allows for efficient strides and strong grip on various surfaces, suitable for skiers from beginners to experts.

BC XPLORE

Material: TPU

Rottefella Xplore Off-Track: Stability and Ease in Challenging Terrains. Master backcountry terrains with the Rottefella Xplore Backcountry Off-Track system, designed for exceptional stability and mobility. The relocated rotation point, wider interface, and innovative SpringPin technology facilitate smoother transitions and reduce snow buildup. Equipped with a 36 mm heel lifter for easier uphill movement, this binding is perfect for boots integrated with the Xplore system.

ROTTEFELLA BC

Material: TPU

Rottefella NNN BC: Rugged Design for Demanding Conditions. Designed for the backcountry, Rottefella's NNN BC is a durable and wider version of the regular NNN, tailored for challenging environments. Made of lightweight TPU, it offers excellent support and reliable traction with its aggressive tread pattern, ideal for snow, ice, and slippery surfaces.

75 MM

Material: TPU

Standard 75 mm sole; provides excellent support in rugged terrain; non-slip profile with specially made rubber mixture. Tourer free 75 and Alaska 75 use Vibram brand soles.

COMFORT XC

GAITERS

Gaiters cover the shoe and lower leg entirely and protect against cold, water, moisture, and snow. Gaiters are elastic and adaptable in shoe instep to different foot shapes. On the one hand, gaiters are water-tight but, on the other hand, also breathable in the instep area of the shoe.

ALPINA ELITE GAITER

Material: Polyester and TPU foil

Ultralight thin-layer elastic Polyester-made gaiters combine breathability and water tightness. It improves the lightness of the shoe. The inside side is equipped with thin PU foil to prevent water and moisture penetration and absorption, while the instep area is free of any foil to ensure breathability. Gaiters are equipped with elastic tape for gaiter adaptability to various lower leg shapes.

ALPINA 4DRY

4DRY stands for an innovative system made from bi-elastic PES textile material laminated with a membrane that allows the boot water impermeable and allows it to breathe. The material feels light and is hydrophobic, whisking away water and moisture to maximize comfort and ensure a dry and warm foot.

ALPINA PULSE GAITER

Material: PVC and Neoprene

Made out of PVC, it enables strength, lightweight, elasticity, and high durability, while NEOPRENE maintains good flexibility over a wide temperature range and offers good insulation against both wet and cold.

MEMBRANES

Alpina membranes are designed to keep your feet dry, warm, and comfortable in any weather condition. Whether you're skiing through deep powder or skating on groomed trails, Alpina membranes will help you stay protected from the elements. They are also lightweight and durable. This makes them a good choice for winter cross- and back-country boots, as they won't add too much weight to your boots and they will last for many seasons.

ALPITEX MEMBRANE

Material: PU Membrane

The Alpitex membrane provides additional protection against water and moisture, which increases comfort, even in more extreme weather conditions.

THINSULATE INSULATION

"Thinsulate" insulation provides up to twice as much thermal shoe insulation. It provides the foot maximum thermal comfort even under icy and high-humidity conditions.

ALPINA IGLOO

Material: Felt

Advanced use of insulation provides the foot with maximum thermal comfort.

LACING

Alpina offers two unique lacing systems for cross-country and backcountry boots: Diamond Lacing and Prime Lacing. Both systems are designed to improve torsional stability and power transfer, but they have slightly different characteristics. Alpina Diamond Lacing and Prime Lacing are two unique lacing systems that offer improved torsional stability and power transfer for cross-country and backcountry boots. The best lacing system for you will depend on your individual needs and preferences.

ALPINA DIAMOND LACING

A braid angle of 45° relative to the longitudinal direction of the shoe improves the torsional stability of the soft part of the shoe. This ensures a tight fit between the shoe and the foot in the rotation phase of the shoe toward the inner side when skiing the skating technique. It also improves the torsional stability of the overall shoe and helps deliver power to the user.

ALPINA PRIME LACING

A braid angle of 90° relative to the longitudinal direction of the shoe provides maximum grip in the instep and ensures a tight fit between the boot and the heel when skiing the classical technique.

FOOTBEDS

Footbeds are vital for both cross country and backcountry activities. They optimize the foot-chassis connection, enhancing stability, comfort, and performance.

ALPINA ORTHOLITE

Alpina OrthoLite® insole technology creates a thermal barrier that elevates footwear temperature regulation to an unprecedented level, infusing open-cell PU foam with a proprietary aerogel creating the lightest, most advanced version of the world's most insulative material delivering unmatched thermal insulation and all-day comfort and cold weather protection underfoot.

ALPINA COMP

Introducing the ALPINA COMP footbed, engineered to elevate your outdoor experiences. Crafted with precision, this footbed features open-cell PU foam, which not only provides exceptional cushioning but also enhances breathability, ensuring your feet stay fresh throughout your adventures. The advanced insulation technology in the ALPINA COMP footbed offers reliable protection from the elements, keeping your feet warm in cold weather.

ALPINA TOUR

Anatomic insole contributes significantly to the vertical stability of the foot, providing a high level of comfort and improving the thermal insulation of the shoe, and keeping your feet dry.

EDGE

STEEL EDGE

The incorporation of durable steel edges in our Nordic backcountry skis goes beyond merely extending their lifespan. These robust steel edges play a pivotal role in providing enhanced control and stability, especially when navigating through challenging icy and ungroomed terrains during your backcountry adventures.

BASE

MULTI GRIP EMBOSSED

Designed to provide perfect grip and control of the kick, especially in soft snow during your backcountry adventures. With strategically placed multiple grip points and an embossed surface, these skis ensure unparalleled traction, allowing you to confidently navigate diverse terrains.

PE BASE

Developed to cater to the specific needs of occasional skiers who prefer a hassle-free experience with little to no maintenance.

CORE

ULTRA LIGHT WOOD CORE

Poplar wood is utilized within the core for enhanced durability in robust models. Additionally, a coating of UL WOOD is applied, ensuring optimal torsional and bending stiffness while minimizing weight.

80-58-69	no

The perfect choice for skier that demand stability, control and edge grip in the ungroomed terrain. Full metal edges provide grip when you need to head downhill or control when you need to traverse across steeper terrain. The camber design aides in flotation and issues easier maneuvering when you need to change course.

Recommended boots: Alaska XP, Alaska, Pioneer PRO, Discoverer Vital, Pioneer Tech, Discoverer Free, Tourer PRO.

61-50-55	

Introducing the Control 60E with the 3/4 Length Steel Edge: Experience lightweight agility and versatile performance tailored for off-track exploration. Designed for skiers seeking nimble maneuverability, this option features a steel edge extending 3/4 of the ski's length, striking a balance between weight and control. Perfect for venturing into softer snow and less demanding terrain, it offers an exhilarating experience beyond the groomed tracks. Embrace the freedom of off-trail skiing while enjoying the stability provided by the Posi-grip base, which ensures confident ascents on varied slopes. The innovative early rise tip design enhances responsiveness, making turns effortless in diverse conditions.

Recommended boots: T30, T40, Outlander, Tourer Light, Tourer Free.

VCP

VOLUME CONTROL PLATE: personalized Footwear Experience

Introducing Alpina's Volume Control Plate (VCP), an engineering marvel placed under the insole to fine-tune your boot's volume. Every foot is different, and the VCP allows you to customize the left and right foot independently. Adjust for a perfect fit that provides optimal comfort and support. If you need more space, removing the plate is easy. Experience a personalized fit with the VCP, designed to accommodate the unique shape of your feet.

NON PVC

Eco-Conscious Durability

At Alpina, we emphasize sustainability in every product. Our non-PVC cross-country boots are made from recycled polyester and TPU, materials that offer the same durability as PVC while being significantly more eco-friendly. Choosing these boots helps you reduce your ecological footprint and support our green initiatives. We proudly offer footwear that cares for both you and the planet.

C³

Our revolutionary C³ technology, the Complete Control Cuff, sets ALPINA apart as the world's first and only ski boot producer that has developed a system that allows women to adjust calf volume in a mere 5 seconds, without the need for any tools. While competitors offer limited adjustments with so-called spoilers, C³ technology stands out by providing an anatomical adjustment from the ankle area to the top of the boot for complete control over your comfort and volume.

XFRAME

A rigid, lightweight structural frame connects the four main stress points and is reinforced on the most demanding axes, ensuring maximum strength and rigidity while reducing weight.

MADE IN EUROPE

European Craftsmanship: handmade to the Highest Standards.

Crafted in Europe, our footwear represents the pinnacle of handmade production, demanding exceptional levels of craftsmanship and shoemaking expertise for unmatched quality.

CUFF ALIGNMENT

A rigid, lightweight structural frame connects the four main stress points and is reinforced on the most demanding axes, ensuring maximum strength and rigidity while reducing weight.

PERFORMANCE DH

CUFFS

EASY ENTRY

The EASY ENTRY cuff construction features a two-part design that opens lengthwise, allowing for effortless foot entry, making it ideal for kids and beginners. With just one buckle and a strap, it offers a secure fit while maintaining simplicity and ease of use, ensuring comfort and convenience for those new to skiing.

X-CUFF

The X-CUFF is made from a single piece of material, softer than the lower part for easier adjustment. The back of the cuff is lowered to provide better ergonomic fit, especially suited to the male leg shape, ensuring comfort and flexibility during use.

C³

Our revolutionary C³ technology, the Complete Control Cuff, sets ALPINA apart as the world's first and only ski boot producer that has developed a system that allows women to adjust calf volume in a mere 5 seconds, without the need for any tools. While competitors offer limited adjustments with so-called spoilers, C³ technology stands out by providing an anatomical adjustment from the ankle area to the top of the boot for complete control over your comfort and volume.

E-CUFF

The E-CUFF is designed with ergonomics in mind, providing a flexible and adaptive fit. It is constructed from a softer material compared to the shell, allowing for easier adjustment and movement. The back of the cuff is lowered for a better ergonomic fit, particularly suited to the leg shape, enhancing comfort and control during skiing.

DUO CUFF

The DUO Cuff provides a smooth, proper flex tailored for lightweight young skiers of varying heights, with reinforced areas ensuring stability. The progressive cuff design increases in support and stiffness as the boot size grows, offering the right level of flex for each stage of development.

SHELLS

X-SHELL

The X-Shell of the alpine boot features a wider last that can be adjusted for volume using the VCP system, allowing for a personalized fit. Molded from a single piece, the X-Shell offers durability and structural support. A built-in seal at the overlap effectively prevents water from entering, keeping your feet dry in all conditions. This shell design ensures comfort, protection, and a precise fit for enhanced skiing performance.

EON

The kids' EON shell has a larger volume and softer plastic for added comfort and flexibility. The design allows for easy foot entry and simple fastening, making them perfect for young skiers and beginners.

DUO SHELL

The DUO Shell is designed to offer stability and comfort for young skiers, adapting to their needs with its lightweight yet durable construction. It delivers proper control and protection, supporting safe and enjoyable skiing experiences.

E-SHELL

The E-SHELL features an ergonomic design with a modern look. Its volume can be easily adjusted using the VCP plate, ensuring a custom fit for enhanced comfort and performance.

ZOOM

The ZOOM cuff and shell are molded from a single piece of a bit softer material, providing easier flexibility and smoother bending. With one buckle and strap, the front part of the cuff leans forward for better control, while the back opens for easy entry. This design ensures a comfortable fit and is ideal for skiers looking for ease of use and flexibility.

BUCKLES

MACRO

The MACRO buckle offers versatile adjustability, with two options: a traditional strap or a movable ratchet system. This flexibility allows skiers to easily fine-tune the fit around the boot, ensuring a secure and comfortable hold. Its sturdy design is built for durability and reliability, making it ideal for skiers who require quick adjustments during performance.

MICRO

The MICRO buckle provides precise fit adjustments with a simple turn of the buckle. This fine-tuning system allows for small, incremental changes to achieve an optimal fit around the foot and leg. The MICRO buckle is perfect for those who need precision and control, delivering a snug, customized fit without sacrificing comfort or ease of use.

E-STRAP

The E-Strap combines a 4-buckle system with a power strap for enhanced adaptability. This unique design allows for greater adjustment to the C3 cuff design, accommodating a variety of calf sizes and shapes. The E-Strap ensures a secure, tailored fit while providing excellent support and stability, especially for skiers with wider calves, enhancing comfort and performance on the slopes.

SOLES

GRIP WALK

Enhanced Walking Comfort and Traction

GRIP WALK is a ski boot sole technology featuring a rockered profile and high-traction rubber tread. Designed for improved walking comfort and superior grip, it offers enhanced stability and ease of movement on diverse surfaces.

GRIP WALK OPTION

Upgrade with GRIP WALK Soles

Enhance your ski boots with GRIP WALK soles, available for separate purchase. Easily attachable, this technology features a rockered profile and high-traction rubber tread for improved walking comfort, grip, and stability on various surfaces.

ALPINA SOLE

The standard alpine boot sole is designed according to the DH ISO 5355 standard, ensuring compatibility with most downhill ski bindings. This durable sole offers reliable grip and stability, providing optimal power transfer and control on the slopes, making it a trusted choice for downhill skiing.

CUFF

SHELL

BUCKLE

SOLE

COMFORT DH

LINERS

A-FIT

Experience unmatched comfort with Alpina's A-Fit Custom Fit Technology. By heating the boot liners and molding them to your feet, you get a ski boot that fits like a glove. This quick molding process guarantees support and stability tailored to your unique foot shape.

ECO

The ECO liner is crafted using a four-layer sandwich construction, laminated for optimal performance. The outer layer is tougher and more rigid, offering durability and protection. The middle layer provides both insulation and comfort, ensuring warmth and cushioning. Additional padding in the heel improves grip and comfort, while the soft, inner lining delivers a cozy, warm feel for all-day comfort on the slopes.

ECO-M

The inner boot features a rubber coating over the sole and seams for added protection, compactness, and insulation. It has a roomier fit, with neoprene over the toes for warmth, and igloo insulation with a vario connection for better sole width adjustment and water resistance. Extra foam in the heel adds comfort, while the full inner lining ensures better insulation and overall comfort.

X-FIT

The X-FIT inner boot features a fur-lined interior for warmth and comfort, a strong strap for easy carrying, and three-layer foam for added softness, insulation, and support. The rubber-coated insole ensures better foot stability and sole protection, making X-FIT the perfect balance of comfort and performance.

DUO-FIT

The DUO-Fit inner boot is specially designed for kids, offering a lightweight build for easy wear and movement. Its soft, warm liner ensures a cozy fit, while the adaptable design provides maximum comfort. With easy maintenance, DUO-Fit is the perfect combination of practicality and warmth for young adventurers.

EON-FIT

The EON kids' boots feature a two-part inner boot, with the back section integrated into the back cuff for easier entry and a snug fit. The soft, warm liner ensures comfort, making these boots perfect for keeping little feet cozy and supported.

INSULATIONS

THINSULATE

Superior Thinsulate Insulation for Footwear
Thinsulate insulation offers up to twice the thermal comfort of standard materials, ensuring optimal warmth for your feet even in icy and humid conditions.

ALPINA IGLOO

Material: Felt
Enhanced Thermal Protection with Felt Insulation
Our footwear features advanced use of premium felt insulation, tailored for extreme weather conditions. This high-quality material provides unparalleled thermal comfort, safeguarding your feet against the cold.
