QUALITY AND SAFETY

ENG The variety of materials and technology used in manufacturing have made IDEA a high quality boot perfectly suited to introducing children to the sport of skiing in an easy, technical, efficient and absolutely safe manner.

ITA Tutte le componenti che entrano in IDEA utilizzano i migliori materiali con qualità produttiva e scappone di ultima generazione, ideati per andare allo sci in modo economico e valido e sicuro.

DEU Alle Teilsachen der IDEA besteht sind von besten Materialien der Skiherstellung verwendeten Material gefertigt, um unseren Kindern ein kostengünstiges und technisches richtiges Einstieg in die Skifahren zu ermöglichen.

FRA Tous les composants de l'IDEA sont fait avec les meilleurs matériaux utilisés pour les chaussures de ski de dernière génération, permettant de garantir aux enfants une pratique du ski sûre et technique.

Shell: Polypropylene (PP)
Buckles: Aluminum (ALU) and Polycarbonate (PC)
Pad: Slow memory foam
Lining: Easy Entry System Lycra and velvet

Scafo: Polipropilene (PP)
Leve: Alluminio (ALU) e Policarbonato (PC)
Imbottitura: agglomerato Slow-memory foam
Foderia: Lycra per Easy Entry System Velvet (Velluto)

223 mm

SOLE LENGTH

Schale: Polypropylen (PP)
Schnallen: Aluminium (ALU) und Polycarbonat (PC)
Polsterung: langsam anpassender Memory Foam
Futter: Easy Entry System Lycra und Samt

Coeque: Polypropylène (PP)
Boucles: Aluminium (alu) et Polycarbonate (PC)
Garniture: mousse agglomérée à mémoire de forme
Doublure: système d'entrée facile Lycra et velours

LENGTH GROWTH COMPENSATOR

ENG The "6 in 1" system is unbelievably easy to use : to select the right length you just need to rotate the lever placed on the lower part of the boot (close to the heel) to the chosen size.

1. Open the buckles of your boot;
2. Rotate the lever to reach the desired size;
3. Close the lever to the proper pos.

ITA Il sistema "6 in 1" è semplicissimo: Per scegliere la taglia basta ruotare un unico leva posta nella parte bassa della scarponcino.

1. Allentare le leve dello scarpone;
2. Ruotare la leva di regolazione fino a raggiungere la misura desiderata;
3. Bloccare la leva di regolazione nell'apposito piolo.

DEU Das "6 in 1" Verstellsystem ist unglaublich einfach zu bedienen und richtig: Länge auszuwählen nimmt man den Hebel auf der unteren Teil des Schuhs platziert (in rechter Form) auf die gewünschte Größe drehen.

1. Die Schnallen des Schuhs öffnen;
2. Den Hebel drehen bis die gewünschte Größe erreicht;
3. Den Hebel zurück in die ursprüngliche Position drehen.

FRA Le système "6 in 1" est simple pour choisir la taille à faire pivoter un unique levier situé dans la partie basse de la chaussure (à l'extérieur).

1. Ouvrir les boucles de la chaussure;
2. Tourner le levier à l'angle jusqu'à la taille désirée;
3. Reposer le levier à l'angle qu'il occupait avant d'être réglé.

LINER BELLOWS SYSTEM "LBS"

ENG The sole featured DEAs liner is a unique edging system.

Unlike any other system today, the bellows allow real-time of the liner allowing for the natural development of the foot. The Liner Bellows System (LBS) has been devised to avoid any uncomfortable pressure through all parts of the foot. The bellows (LBS) system allows the liner and shell to work in tandem to produce a fit that is accurate, comfortable and warm. In fact, the natural resting position of the liner is with the bellows extended to the largest size (PC, A) while turning the shell makes the bellows compress (PC, B) into smaller sizes. It is easy to see that to notch the foot makes the liner grow to the shell's fit.

PC, A

PC, B

ITA La scarpetta di IDEA ha tagliato variabile grazie al sistema LBS, basato su un soffietto a membrana che rispetta lo sviluppo del piede ed evita pressioni in altri discomfort sia di età, sia di caviglie e al calcagno. Quando lo scalfio regolato si allarga, il più grande sistema LBS si presenta al piede in nella sua estensione massima (PC, A) solo con bloccare della scalfia il sistema si comprime (PC, B) adattandosi alle taglie inferiori.

Non è facile ad allungare naturalmente la scarpetta, bensì la linea dello scalfio che comprime ottimalmente il sistema.

DEU Das Hauptmerkmal des Größenanpassungsfähigen IDEA Innenschuhs ist das gewöhnlich und einzigartig: Anders als die meisten anderen "Teiler"-Systeme, die vorwiegend in größeren Passagen gefügt, zu sein ermöglicht die DEA Innenschuh durch ein atmungsaktives System eine wirkliche Größenverstellung bei gleichzeitiger Rückstrommaß der natürlichen Entwicklung des Fußes (Das "Ziehmanuskript" (LBS) wurde entwickelt um jeglichen Druck in der Ferse, den Knien oder eine geringe mechanische Innenraum zu vermeiden. Tatsächlich regelt sich das natürliche, ergonomische Innenschuh durch die, die der Innenschuh in der großen Größe der Schuhe gewickelt wird (PC, A) und sich dann, wenn die Schale in eine kleinere Größe verstellbar wird zusammenzieht (PC, B). Somit ist es leicht zu verstehen, dass nicht der Fuß Druck auf den Innenschuh ausüben muß, um die Größe zu verstellen, sondern die Schale diesen Vorgang vornimmt.

FRA Le principe constructif du chaussure de l'IDEA est un système d'ajustement unique et particulier qui évite les différences de mesure, partie des "classe" systèmes de réglages disponibles à partir d'un unique soufflet compensateur permettant une vraie croissance du chaussure respectant le développement normal du pied. Les système LBS du chaussure ne compresse que le pied qui change de taille, mais le pied qui change la chaussure mais l'action de la coque qui comprime ou l'ajuste le cuir.

THE ADJUSTABLE SKI BOOT FOR FAST GROWING KIDS.

ENG The new line is coming with three different models. The IDEA UP covers sizes from 16.0 to 18.5 MP and sizes from 19.0 to 22.0 MP while the new charming IDEA FREE covers sizes from 22.5 to 25.5 MP. These three items correspond to three new lines differentiated under the closure system standpoint. The IDEA UP 16.0-18.5 is a single buckled traditional construction shelled boot while the IDEA UP 19.0-22.0 is a new two buckled boot provided with a special water shell sealing layer. IDEA FREE 22.5-25.5 is the new three buckled and cuff Power Strap strapped boot, provided with a special water shell sealing layer.

IDEA UP AND IDEA FREE

160 165 170 175 180 185 190 195 200 205 210 215 220 225 230 235 240 245 250 255

IDEA UP size 16.0 – 18.5 **IDEA UP size 19.0 – 22.0** **IDEA FREE size 22.5 – 25.5**

ITA L'ultima generazione di IDEA è composta da tre varianti differenti. IDEA UP copre le taglie più piccole (16.0-18.5 MP e 19.0-22.0 MP) mentre il nuovo IDEA FREE copre le taglie più grandi (22.5-25.5 MP). Queste tre varianti corrispondono ai tre nuovi modelli, che differiscono tra loro per il sistema di chiusura. IDEA UP 16.0-18.5 possiede, infatti, un unico ganco di chiusura mentre IDEA UP 19.0-22.0 monta, su un nuovo scafo dotato di uno speciale inserto impermeabilizzante contro le infiltrazioni, un sistema di chiusura a due ganci. IDEA FREE 22.5-25.5, infine, è dotato del medesimo scafo ad alta tenuta contro le infiltrazioni e di un sistema di chiusura composto da tre ganci più un'ulteriore chiusura in Power Strap.

DEU Die neue Range besteht aus drei verschiedenen Modelltypen. Das Modell IDEA UP deckt mit 2 Schalen die Größen MP 16.0 bis 18.5 (EU 25-29) und MP 19.0 bis 22.0 (EU 30-35) ab. Das obere Größenspektrum von MP 22.5 bis 25.5 (EU 36-40) bedient das Modell IDEA FREE. Diese drei neuen Modelle unterscheiden sich im Wesentlichen über ihr Verschlusssystem. Die kleinste Größe, der IDEA UP (EU 25-29), ist eine traditionelle 1-Schnall- Konstruktion für Kinder, während sich die mittlere Größe (EU 30-35) als eine neue 2-Schnall- Konstruktion mit einem speziellen wasserabweisenden Layer präsentiert. Das Modell IDEA FREE (EU 36-40) mit 3 Schnallen und einem Power Strap Topverschluss wurde völlig neu konzipiert. Auch hier kommt das „Water-Shell-Sealing-Layer“ zum Einsatz.

FRA La nouvelle ligne arrive avec 3 modèles différents. IDEA UP couvre les tailles de 16.0 à 18.5 MP et 19.0 à 22.0 MP alors que IDEA FREE couvre les tailles de 22.5 à 25.5 MP. Ces trois références correspondent aux trois nouvelles lignes différentes du point de vue du système de fermeture. IDEA UP 16.0-18.5 a une construction traditionnelle et une seule boucle de fermeture, alors que IDEA UP 19.0-22.0 est une nouvelle chaussure avec double boucle de fermeture et une couche d'étanchéité supplémentaire au niveau de la coque. IDEA FREE 22.5-25.5 est une nouvelle chaussure avec 3 boucles de fermeture, un strap Power Strap au niveau de la cheville et une couche d'étanchéité supplémentaire au niveau de la coque.

TOTAL PROTECTION

ENG All the new line is provided with a special water shell sealing layer that proves to be an effective barrier against water and snow. If the first generation of IDEA proved to be 100% water protective, the new one is still 100% protective with the additional guarantee of the special layer.

ITA Se la prima generazione di IDEA si è dimostrata essere al 100% resistente alle infiltrazioni, con la seconda generazione Roces siamo al 100% di garanzia con l'ulteriore aggiunta di uno speciale inserto impermeabilizzante che funge da barriera contro infiltrazioni. Funzionalità e design si integrano.

DEU Alle Modelle der neuen Range sind mit einem speziellen „Water-Shell-Sealing-Layer“, einer funktionell effektiv wasserabweisenden Schicht, gegen Wasser und Schnee ausgestattet. Nachdem bereits die erste Generation IDEA konstruktionsbedingt hoch verlässlich gegen Wassereintritt war, bietet dieses neue Feature nun nochmals zusätzlichen Schutz.

FRA Toute la nouvelle ligne possède une couche d'étanchéité spéciale de la coque qui se révèle être une barrière efficace contre l'eau et la neige. Si la première génération de IDEA s'est avérée être 100% étanche à l'eau, cette nouvelle génération l'est toujours mais avec une garantie supplémentaire grâce de la coque spéciale d'étanchéité.

SELF - SETTLING SHELL WRAP

ENG Designed and studied to improve the ankle-foot wrapping and the progressive flexure, placed in between the frontal shell overlapping it enhances the comfort and snow stopping guarantee of the special layer.

ITA Sviluppato per migliorare l'avvolgimento attorno alla caviglia e il flex progressivo; è collo-cato tra scafo e scarpetta e dona ottimo comfort eliminando le possibili infiltrazioni.

DEU Der überarbeitete Schaft bietet durch seine spezielle Bauweise optimalen Halt und Schutz für das Sprunggelenk bei gleichzeitig progressivem Flex. Er bildet die überlappende Schnittstelle zur unteren Schale und Zunge und ist somit maßgeblich für den Komfort und den Schutz vor Schnee.

FRA Conçu et étudié pour améliorer la couverture cheville-pied et la flexion progressive, placé entre au niveau du chevauchement de la coque fronta-le, il améliore le confort et l'arrêt de la neige.

ROCES® 44

GOING DEEPER INSIDE THE COMPARISON WITH OTHER RENTAL SKATES

	ROCES	COMPETITOR
MATERIAL	High Grade PU, PA6 (72 ShoreD hardness) Lasts up to twice and resistant against wear and tear	S.E.B.S. (Thermo Plastic) Easy to scratch
CLOSURE	Strong and long lasting micro-adjustable buckles. A special spring facilitates the work of the buckle and increases its life over time (see next slide)	Problem with the turning buckle (see focus on the next slide)
LINER	360° lining Removable Quick drying Self-adjusting (for kids models)	Partial lining (lining does not include the heel area)
SIZE ADJUSTMENT SYSTEM	Easy, quick, precise, tool-free and inventory friendly size adjustment system.	Size range is less inventory friendly compared to Rocés size range.
